*Theory and Methodology of Semiotics* Alexandros Ph. Lagopoulos, Karin Boklund-Lagopoulou, 2020-11-23 The book is an in depth presentation of the European branch of semiotic theory originating in the work of Ferdinand de Saussure It has four parts a historical introduction the analysis of langue narrative theory and communication theory Part I briefly presents all the semiotic schools and their main points of reference Although this material is accessible in many other Anglophone publications the presentation is marked by specific choices aiming to display similarities and differences The analysis of langue in Part II is also available in Anglophone bibliography but the book presents Saussurean theory according to a new theoretical rationale and enriched with later developments In addition it is orientated so as to offer the foundation for the part that follows Part III is a presentation of Greimasian narrative theory well documented in Francophone bibliography but poorly represented in Anglophone publications The presentation extends the theory in both a qualitative and a new quantitative direction and includes a great number of examples and two extended textual analyses to help the reader understand and apply it Part IV communication theory combines an extension of Greimasian sociosemiotics with other schools of thought This original theoretical section discusses fourteen consecutive communication models the synthesis of which results in a holistic social semiotic theory of communication

*The Semiotic Sphere* Thomas A. Sebeok, Jean Umiker-Sebeok, 2012-12-06 Although semiotics has in one guise or another flourished uninterruptedly since pre Socratic times in the West and important semiotic themes have

emerged and developed independently in both the Brahmanic and Buddhist traditions semiotics as an organized undertaking began to take form only in the 1960s Workshops materialized with a perhaps surprising spontaneity over much of Europe Eastern and Western and in North America Thereafter others quickly surfaced almost everywhere over the globe Different places strategically allied themselves with different legacies but all had a common thrust to aim at a general theory of signs by way of a description of different sign systems their comparative analysis and their classification More or less permanent confederations were forged with the most diverse academic disciplines and amazingly varied frameworks were devised suited to the needs of the times and the sites to carry the work of consolidation forward Bit by bit mutually supportive international networks were put together Today it can truly be asserted that semiotics has become a global enterprise This of course is far from saying that the map is uniform or even that world wide homogeneity is in the least desirable While our conjoint ultimate goal remains steadily in focus the multiplicity of avenues available for its realization is inherent in the advent of the search itself

**Semiotic Theory and Practice** Michael Herzfeld, Lucio Melazzo, 1988 *Umberto Eco in His Own Words* Torkild Thellefsen, Bent Sørensen, 2017-08-21 Hitherto there has been no book that attempted to sum up the breadth of Umberto Eco's work and its importance for the study of semiotics communication and cognition There have been anthologies and overviews of Eco's work within Eco Studies sometimes works in semiotics have used aspects of Eco's work Yet thus far there has been no overview of the work of Eco in the breadth of semiotics This volume is a contribution to both semiotics and Eco studies The 40 scholars who participate in the volume come from a variety of disciplines but have all chosen to work with a favorite quotation from Eco that they find particularly illustrative of the issues that his work raises Some of the scholars have worked exegetically placing the quotation within a tradition others have determined the epistemic value of the quotation and offered a critique while still others have seen the quotation as a starting point for conceptual developments within a field of application However each article within this volume points toward the relevance of Eco for contemporary studies concerning semiotics
