

## ❑ MANUAL HANDLING – DEFINITION

Manual Handling is when workers use their bodies to manually handle objects at work, and can simply be **just moving something from one place to another**. This can include transporting and supporting, which can be through the use of, for example, **your hand or the force of your whole body**.

It has been estimated that manual handling injuries account for between 25% and 40% of all workplace injuries. Some people don't realise that manual handling doesn't just occur in workshops and warehouse but in every occupational environment, including the office.

**This means that we are all at risk of manual handling injuries and we all need to know how to prevent them.**
