Book Histories** Philip Beeley,Ciarán Mac an Bhaird,2024-08-12 This book both articulates and responds to increasing
scholarly interest in the materiality of the book Taking as its base the unique collection of mathematical books in the Russell
Library at Maynooth it addresses questions related to printing techniques and print culture book production provenance and
reading practices It considers the histories of individual items of the Russell Collection their previous locations and owners
and explores ways in which annotations underlinings hand drawn diagrams and the like reveal patterns of reading and usage
Finally it seeks to elicit more information on a previously under researched topic the historical role of mathematics in the
extensive network of Irish colleges that once covered Catholic Europe located in places such as Salamanca Rome Douai and
Prague Alongside delivering important new insights into print culture as a medium for transmitting scientific ideas
Mathematical Book Histories is thus also intended to contribute to a broader understanding of the role and significance of
mathematics in the context of clerical instruction and more broadly in the academic tradition of Ireland up to the beginning
of the twentieth century Many of the volumes in the Russell Library reflect the remarkably rich book trade that flourished in
seventeenth and early eighteenth century Dublin and which was quite distinct from that in London Booksellers often bought
in their wares directly from abroad with the result that publications could enter collections that did not enter the purview of
