

Emergency

Care and Transportation of the Sick and Injured

In 1975 the American Academy of Orthotronics, through AAOS, published the first edition of *Emergency Care and Transportation of the Sick and Injured* and made the foundation for EMS education. Today, the Tenth Edition of this gold standard training program meets the highest needs for professional medical systems and extensive educational resources that meet the diverse needs of both instructors and students.

Based on the National EMS Education Standards and the 2010 CPEBEC Guidelines, the Tenth Edition offers complete coverage of every competency standard with clarity and precision in a unique format that provides a robust comprehension and encourages critical thinking with vignettes and clinical scenarios in personnel, along with new skills and theories, to ensure a robust and successful EMT training solution.

Current, State-of-the-Art Medical Content

The Tenth Edition incorporates evidence-based medical concepts to ensure that students are taught consistent and accurate medicine that will help patients in the field today.

Concept Reinforcement

The Tenth Edition is built on the premise that students need a solid foundation in the basic and then appropriate interventions. For example, the Tenth Edition provides students with a comprehensive understanding of anatomy, physiology, and pathophysiology of the human body. These concepts then are directly correlated within individual chapters, thus solidifying the foundational knowledge and offering examples when analyzing specific scenarios.

The Tenth Edition also applies the unique approach of concept reinforcement to Patient Assessment. This critical topic is presented in a single, comprehensive chapter ensuring that students understand patient assessment as a single integrated process—the way that providers actually practice in the field. Each medical and trauma chapter then follows the assessment process by highlighting the medical aspects of the illness or injury.

Clear Application to Real-World EMS

Through involving patient case studies, the Tenth Edition gives students a genuine context for the application of the knowledge presented in the chapters. This approach makes it clear how all of this new information is applied to help patients in the field.

Dynamic Technology Solutions

The Tenth Edition is the cornerstone of a complete teaching and learning system with a wide spectrum of resources.

- **Tenth Edition eTextworkbooks:** Workbooks contain audio narrated, visually sound design in a consistently uniform interface to give students a truly interactive and engaging learning experience. The **Tenth Edition eTextworkbooks** contains the complete contents of the textbook and workbook materials online.
- **EMT Interactive: EMT Illustrated** is a series of online modules that bring EMT lessons to life through flash animations and narration. The modules cover the entire National EMS Education Standards.
- **Napkins: LivePrep:** This dynamic online resource is designed to help prepare students and professionals for state or national certification examinations by providing practice examinations and simulated communications using case-based questions and detailed narratives.
- **www.EMT10E.com:** The engaging companion web site provides a wealth of free resources, including Anatomy Review and Visual Vocabulary. The code printed on the inside front cover of this workbook provides students with special user privileges to a more robust gallery of educational resources, including an audio book.
