America's (Math) Education Crisis Larry Zafran, 2010-10-19 America's education system is in a state of crisis A growing number of America's youth cannot read write or do math at all close to grade level In many cases these students and their families do not realize this or care The situation is compounded by the fact that American society no longer values education and does not understand how learning actually works Frequent reference is made to the illusion of learning in underperforming schools The book explains the difference between true learning and just being exposed to material It explains the essential role that parents play and that even with encouragement a child cannot be forced to learn The book is targeted at parents teachers administrators government officials and concerned citizens Older students may also benefit from reading it Despite its frankness about topics which are

often disregarded and avoided there is nothing in the book that students don't intuitively understand. In particular, many students regularly experience the anonymity of being herded like cattle. The goal of the book is to raise awareness and discuss whether we can fix the problem. We cannot address our nation's education crisis until people understand its underlying causes and scope. The book tells the truth in contrast to the misinformation provided by the government and the news media. Suggested changes for improvement are made, including those that can be implemented quickly and easily and those that require a great deal of money and coordination along with a fundamental change in how America handles education. This book is controversial and covers issues that may anger, upset, or confuse some readers. The book includes curse words to paint a vivid picture of the way many students speak and bluntly labels key aspects of our education system as bullshit where applicable. **On Board**, 2007. THE EDUCATION AND DECONSTRUCTION OF MR. BLOOMBERG Sally A. Friedman, 2010-07-12. This is an exposé detailing New York City Mayor Michael Bloomberg's education and construction policies between 2002 and 2009 inclusive. It covers all major education issues: schools, chancellor, school budget, grading of the schools, reducing class sizes, small charter and culturally themed schools, standardized testing, school safety, overcrowding, and mayoral control; and all major real estate development issues: rezoning, ULURP, self-certification, various fatal construction accidents and disasters, affordable housing, lack of construction law enforcement, and the large projects that characterized the administration. This book features a list of abbreviations and a comprehensive index in the back. A page of the Introduction, p. 11, is crucial for understanding references made throughout the book. Therefore, it is reproduced below. Making himself available to parents: The mayor performed the important tasks of negotiating with the unions, securing funding from the higher powers, and making public relations appearances when there was good news to report. I have observed that there were three recurring themes in Mr. Bloomberg's

modus operandi in both Education and Real Estate Development Theme 1 He was overly optimistic As his various education initiatives and construction projects progressed he routinely threw around and changed numbers on standardized test scores graduation rates school openings school crime rates construction costs creation of jobs and affordable housing units among others and sometimes even distorted facts outright Theme 2 Time after time Mr Bloomberg asked for input from the community or purported to on new school openings and on construction of schools and other projects but usually ended up hiring his cronies and ignored the community s wishes Theme 3 He took advantage of legal loopholes or skirted around the law to forge ahead with his agendum His agendum was to acquire power Why else did he take control of the schools and overturn term limits It was not for the money In November 2009 Mr Bloomberg won his third term election bid by a narrow margin mostly because he was still viewed as a stronger candidate than the opposing one His power and popularity were waning however rocked by various investigations in recent years including a slush fund scandal and corruption and sloppiness in construction that led to fatal accidents that resulted in the termination of decades long unethical practices Further he was accused of being involved in various conflicts of interest and of being hypocritical on environmental and health issues Two farmyard clich s and one generic clich also aptly describe many occurrences during the Bloomberg administration between 2002 and 2009 Clich 1 Just another case of the fox guarding the henhouse Clich 2 Closing the barn door after the horses have already fled Clich 3 Do as I say not as I do The above themes and clich s are so common in my text that I refer to their generic names i e I will use the blog style for example File under Theme 1 or File under Clich 2 when providing evidence of same Enjoy Regents Examination Papers for the Academic Year ... ,1895 **Regents Examination Papers** University of the State of New York.
