significant aspects of education pedagogy and professional issues for teachers at all stages of their professional development. In their consideration of some 103 topics they skilfully blend key theoretical underpinning with current practice in the classroom making this book extremely useable by teachers in all sectors and age phases. The range of topics makes this especially useful because it covers some big issues but also explores some less frequently covered things such as audience and elicitation. What I have found particularly helpful is the fact that in this book I readily recognise aspects of my own classroom practice in the overview of each topic but I am encouraged and inspired to reflect more deeply on my professional development in the light of the collected wisdom and challenging questions. This book will be an invaluable tool for training and beginning teachers as well as for those with years of experience. The inclusion of key questions and further reading means that it can serve as a very accessible reference book, an aide memoir or as a stimulus for more detailed debate, discussion or professional development. Consequently it will support the work of individuals, department or phase teams or even larger groups. The potential to individualise training and coaching by referring trainees to relevant entries is great. I will certainly want to use it when working with trainee teachers and also with teachers undertaking CPD and Masters qualifications. I look forward to Volume 2 appearing in the future.

Simon Spencer, Birmingham City University, UK

I am delighted to welcome this brief but important compendium of the *A-Z of Teaching* written by Jonathan Savage and Martin Fautley, authors with extensive experience of teaching. This book provides eloquent insights and distilled definitions of key terms and concepts in an introductory way that will inform, inspire, engage and help navigate through the maze of key terms which busy students in initial teacher education and practising teachers simply must read.

Pamela Burnard, Faculty of Education, University of Cambridge, UK

This is a very entertaining and well structured resource written in easy and accessible language. It contains a serious, carefully referenced introduction to a number of major issues encountered in the early stages of learning to teach. It will be equally useful for beginners or experienced teachers and mentors as it gives practical guidance about some of the areas for discussion, coaching and assistance which commonly arise when learning to teach.

Professor Janet Hoskyns, Head of School Education, Birmingham City University, UK

Understanding Hard to Maintain Behaviour Change Ron Borland, 2014-02-03. The book presents an integrative theory of hard to maintain behaviours that includes hard to reduce or eliminate behaviours like smoking and other drug use, overconsumption of food or unsafe sex and hard to sustain behaviours like exercise and sun safe behaviours. Most of the examples come from the author's work on tobacco smoking but it is relevant to anyone who is concerned to understand why some forms of desirable behaviour are so hard to achieve and to those trying to help people change. It also has important implications for public health campaigns and for the development of policies to nudge behaviour.
