The following provides the general steps to help you complete the report. It is important to remember that you should be working on the report throughout the semester, not just at the end. The following steps will help you to complete the report in a timely and efficient manner.

From 1979 to 1981, the number of cases of acute myocardial infarction in the United States increased by 10% in men and 15% in women. The increase was most marked in the 45- to 54-year age group, and in the 1980s, the rate of increase was 1% per year in men and 2% per year in women. The increase in the rate of acute myocardial infarction in the United States is a reflection of the increase in the prevalence of coronary artery disease in the United States.
