Hydroponic Gardening tips and tricks Elisabeth ahmadi,2020-04-13 Use These Hydroponic Gardening Tips And Tricks to build your own Garden efficiently This book contains proven steps and strategies on how to grow your own healthy vegetables and fruits There are few things more fulfilling than eating food you have grown and yet each year many people miss this opportunity simply because they don't have suitable soil or land to grow their own produce However there are ways of getting over this hurdle thanks to a system of gardening which does not require the use of soil A hydroponic system is one such system Hydroponics refers to a form of gardening that does not use soil Instead of growing your crops in soil you grow them in a solution made of nutrients and water Think about it plants just like human beings need nutrients in order to grow Soil houses such nutrients This is why we plant our crops in soil But as you know not all soil is created equal Some types of soil are deficient in nutrients and this results in poor yields In addition as stated before many people do not have access to land in the first place This puts them at a disadvantage when it comes to growing their crops Some amazing benefits of hydroponic gardening include Faster plant growth Plants grown in a hydroponic system tend to grow at least 20 percent faster than those grown in soil Better yields You can expect 20 to 25 percent more yield when you adopt hydroponic gardening Less water Less water is needed simply because hydroponic systems are enclosed and thus the plants get the water they need instead of such water being distributed to the surrounding environment Less space Because the plants have easier access to nutrients when they are grown in a hydroponic system they do not need to grow deep roots or spread them widely in search of nutrients Thus you will be able to grow your plants more closely and thus grow more plants in a smaller space More freedom to grow your crops The best thing about hydroponic gardening is that it gives more people the opportunity to grow plants regardless of where they live You can easily grow crops indoors even if you live in an apartment No need of soil With hydroponic gardening you don't use soil Instead you use what is known as grow medium to house or hold the plants This is less messy and easier to control than soil Before you can enjoy the above amazing benefits of opting for hydroponics to grow fruits and vegetables you will first need to learn how to grow plants using this step The first thing you need to do is to select a hydroponic system that will allow you to comfortably grow your vegetables and fruits Here is A Preview Of What You Will Learn What is Hydroponic Gardening Which hydroponic system should I use Which medium should I choose What about hydroponic nutrients and pH Choose a Light Source And Much Much More Take Action Now And Get This Kindle Book For ONLY 0.99

Introduction

The first time I came across an example of raised bed gardening, my reaction was that it is an extremely sensible way of gardening. You do not have to stoop down to ground level. I was seeing these raised garden beds in a friend's home. She loved gardening. She also had back trouble. So crouching down in front of her beloved flower and vegetable as well as her herb garden in order to de-weed them was purgatory to her. And then her handy-do-it-yourself practical husband said, "Why don't we raise the crops and plants in beds which are waist-high." And he immediately set about building 4-foot-wide beds in square-shaped blocks with wood. The soil was raised above ground level and placed in that wooden frame. The results were amazing. It was only 10 years later that I found out that raised bed gardening was being practiced extensively all over the world. Avid gardeners were making bed frames out of concrete, rock, and even wood. They made the containers to their own particular requirements with dimensions ranging from 1.0 m to 2 m, depending on the space they had. Gardening in containers is all very well, but raised gardening eliminates the use of pots. And best of all, as my friend told me, I do the gardening on my raised bed. Himself, her enthusiastic DIY gardener husband, plans to plant plants which love the shade under the raised beds. In that way, we are utilizing every inch of the soil as well as lots of space above ground level. What a sensible way to make gardens in limited spaces. She has the right of it. And this is possibly the reason why so many people want to know all about raised bed gardening in rich organic compost-laden soil. So as you are one of them, let us start with how we can utilize every square inch of our land economically and beneficially by making raised beds, how to make them, how to take care of them, and how to enjoy their harvest. I definitely advocate natural methods for gardening, so I am going to tell you about the best organic and natural gardening practices which people all over the world have been using for centuries. Take advantage of our technology in other aspects of gardening like watering, etc., but still use the old natural methods for fertilizing the soil.
