Algebra Unit 6 Quadratic Algebra L7:

Numerical Polynomial Algebra Hans J. Stetter, 2004-01-01 In many important areas of scientific computing polynomials in one or more variables are employed in the mathematical modeling of real life phenomena yet most of classical computer algebra assumes exact rational data This book is the first comprehensive treatment of the emerging area of numerical polynomial algebra an area that falls between classical numerical analysis and classical computer algebra but surprisingly has received little attention so far The author introduces a conceptual framework that permits the meaningful solution of various algebraic problems with multivariate polynomial equations whose coefficients have some indeterminacy for this purpose he combines approaches of both numerical linear algebra and commutative algebra For the application scientist Numerical Polynomial Algebra provides both a survey of polynomial problems in scientific computing that may be solved numerically and a guide to their numerical treatment In addition the book provides both introductory sections and novel extensions of numerical analysis and computer algebra making it accessible to the reader with expertise in either one of these areas Lagrange Multiplier Approach to Variational Problems and Applications Kazufumi Ito, Karl

Kunisch, 2008-01-01 Lagrange multiplier theory provides a tool for the analysis of a general class of nonlinear variational problems and is the basis for developing efficient and powerful iterative methods for solving these problems This comprehensive monograph analyzes Lagrange multiplier theory and shows its impact on the development of numerical algorithms for problems posed in a function space setting The authors develop and analyze efficient algorithms for constrained optimization and convex optimization problems based on the augmented Lagrangian concept and cover such topics as sensitivity analysis convex optimization second order methods and shape sensitivity calculus General theory is applied to challenging problems in optimal control of partial differential equations image analysis mechanical contact and friction problems and American options for the Black Scholes model Edexcel Modular , 2010 This teacher s pack contains everything you need to deliver effective lessons in mathematics with confidence for students working at Grades D to A
