Intelligent Sensor Node-Based Systems Anamika Ahirwar, Piyush Kumar Shukla, Prashant Kumar Shukla, Ruby Bhatt, 2023-10-06 This new volume covers the fusion of IoT and wireless communication technology for real life applications. It discusses the current developments, trends, and latest usage of technology in wireless sensor networks (WSNs) and IoT, which offer improvement in many areas including enabling smart homes in agricultural systems, security systems for university monitoring systems, and more. The volume also provides a theoretical analysis and discussion of the factors influencing smart sensing, exploring the state of the art IoT elements that are designed to be analogous to WSNs. It looks at advancements in IoT systems along with a two-way usage with wireless sensor networks that span the gap between the physical and virtual worlds, leading to a hyperconnected society where devices are not only used to exchange data but also are smart devices with more capabilities. The chapters reveal how these technologies are used in smart homes for intelligent sensor-based cognitive radio networks for different techniques for data fusion for the synthesis and fabrication of nanosensor devices for monitoring agricultural nutrient levels and more. Furthermore, the fake user problems in WSNs are also investigated with a note on the current trends and the newer trends to come in near future. **Advances in Automation,**

Signal Processing, Instrumentation, and Control Venkata Lakshmi Narayana Komanapalli, N. Sivakumaran, Santosh Kumar Hampannavar, 2021-03-04 This book presents the select proceedings of the International Conference on Automation, Signal Processing, Instrumentation, and Control (iCASIC 2020). The book mainly focuses on emerging technologies in electrical systems, IoT-based instrumentation, advanced industrial automation, and advanced image and signal processing. It also includes studies on the analysis, design, and implementation of instrumentation systems and high accuracy and energy-efficient controllers. The contents of this book will be useful for beginners, researchers, as well as professionals interested in instrumentation and control and other allied fields. *Artificial Intelligence and Evolutionary Computations in Engineering Systems*

Subhransu Sekhar Dash, M. Arun Bhaskar, Bijaya Ketan Panigrahi, Swagatham Das, 2016-02-05 The book is a collection of high quality peer-reviewed research papers presented in the first International Conference on Artificial Intelligence and Evolutionary Computations in Engineering Systems (ICAIECES 2015) held at Velammal Engineering College (VEC) Chennai, India, during 22-23 April 2015. The book discusses a wide variety of industrial engineering and scientific applications of the emerging techniques. Researchers from academic and industry present their original work and exchange ideas, information, techniques, and applications in the field of Communication, Computing, and Power Technologies. **Smart Sensors for Industry 4.0**

Brojo Kishore Mishra, Sandipan Mallik, Duc-Nhuong Le, 2024-09-04 Discover the essential guide to harnessing the power of cutting-edge smart sensors in Industry 4.0, offering deep insights into fundamentals, fabrication techniques, and real-world IIoT applications, equipping you with the knowledge to revolutionize your industrial processes and stay ahead in the digital era. Over the last decade

technologies like the Internet of Things IoT big data cloud computing blockchain artificial intelligence AI machine learning device automation smart sensors etc have become highly developed fundamental supports of Industry 4.0 replacing the conventional production systems with advanced methods and thereby endorsing the smart industry vision Industry 4.0 is more flexible and agile in dealing with several risk factors further enabling improved productivity and efficiency distribution increased profitability data integrity and enhancing customer experience in the current commercial environment For understanding and analyzing the environment sensors play a major role in performing the measurements based on computation produced results from the surrounding environment Sensors have a wide range of applications for smart industrial operations The evolution of flexible low cost and multipurpose sensors and their system integration has been examined to develop advanced devices with applications in numerous fields of technology With the development of both the Internet of Things IoT and the Industrial IoT IIoT advanced sensors and their associated applications are developing resulting in the necessity for IoT sensors to be used for several industrial applications Beneficial aspects of this book include The latest research in materials and methodology for the fabrication of intelligent sensors its IoT system integration and IIoT applications are brought together Promotes a vision towards making sensor based monitoring and control of smart industry Recent advances and challenges of smart sensors are discussed with an emphasis on unmet challenges and future directions of a roadmap to Industry 4.0 Audience This book is highly recommended to a wide range of researchers and industry engineers working in the area of fabrication and integration of industrial smart sensors for IIoT applications advanced materials for sensor technology fabrication and characterization of IoT sensors development of low cost sensors sensor system design and integration and its industrial applications Post graduate students from different streams like computer science electronics and electrical engineering information technology electronic communication etc will benefit from reading this book

Handbook of Research on the IoT, Cloud Computing, and Wireless Network Optimization Singh, Surjit, Mohan Sharma, Rajeev, 2019-03-29 ICT technologies have contributed to the advances in wireless systems which provide seamless connectivity for worldwide communication The growth of interconnected devices and the need to store manage and process the data from them has led to increased research on the intersection of the internet of things and cloud computing The Handbook of Research on the IoT Cloud Computing and Wireless Network Optimization is a pivotal reference source that provides the latest research findings and solutions for the design and augmentation of wireless systems and cloud computing The content within this publication examines data mining machine learning and software engineering and is designed for IT specialists software engineers researchers academicians industry professionals and students

Operation of Smart Homes Mehdi Rahmani-Andebili, 2021-06-15 This book presents the latest research advancements in the operation of smart homes It comprises new operation techniques including cooperative distributed energy scheduling framework to react to malicious cyberattacks framework for demand side management and framework for the design of smart homes to support

residents wellness as well as new optimization techniques such as stochastic model predictive control and multi time scale optimization In addition the book analyzes 11 000 studies that have been indexed in scientific databases and categorizes them based on various data points including the field and the subject of the research the name of the institutions and the nationality of the authors Presents new operation techniques of smart homes Introduces new optimization techniques for operation of smart homes Analyses 11 000 studies and categorizes them based on different data points **Disruptive**

Technologies for Sustainable Development G. Nagappan,V Uma Rani,2024-06-07 We feel greatly honoured to have been assigned the job of organizing the AICTE Sponsored International Conference on Application of AI ML DL Big Data on Recent Societal Issues ICARSI 2023 on April 21 April 22 2023 at Saveetha Engineering College The international conference is a platform that brings together the brightest minds from across the globe to share their ideas and insights on the recent societal issues with Artificial intelligence Machine Learning Deep Learning Big data and emerging technologies With an aim to promote collaboration and foster innovation this conference promises to be a melting pot of ideas and knowledge sharing

Revolutionizing Industrial Automation Through the Convergence of Artificial Intelligence and the Internet of Things Mishra, Divya Upadhyay,Sharma, Shanu,2022-09-23 With the development of innovative technologies the study of industrial automation is obtaining extraordinary attention from academia governments researchers and various industrial communities The technical innovations in advanced technologies such as deep learning blockchain artificial intelligence of things AIOT and more have unlocked the potential for bringing intelligent automation and efficiency to the industries to control their various operations These new technologies provide an efficient and secure way for industries to manage and develop products intelligently Revolutionizing Industrial Automation Through the Convergence of Artificial Intelligence and the Internet of Things includes the recent advancements in exploring and developing AIOT powered strategies and mechanisms for future industrial automation and transforming industrial functions and architectures to help improve various industrial operations Covering topics such as convolutional neural networks smart urban logistics and industrial automation this premier reference source is an excellent resource for computer scientists IT managers engineers business leaders and executives logistics managers students and faculty of higher education libraries researchers and academicians Artificial Intelligence, Internet of Things, and Society 5.0 Azzam Hannon,Abdullah Mahmood,2023-11-08 This book unlike any other previous book provides a platform for scholars and researchers to present the latest insights and findings on the application of artificial intelligence and other sustainable technologies for a human centric society It brings together technology with society with special attention given to AI and IoT related intricacies for a digital economy It covers a variety of research topics including block ciphers network marketing for sustainability entrepreneurship and AI AI and stock trading decisions digital transformation knowledge management chatbot engineering cybersecurity and smart metering system The book is a comprehensive reference work for scholars academics policymakers students and professionals presenting an overall

understanding of AI its present and future trends and presents a discourse on important policies and strategies on inclusivity diversity bias accountability security metaverse applications of AI and other technologies such as IoT

Smart Sensor Networks Umang Singh,Ajith Abraham,Arturas Kaklauskas,Tzung-Pei Hong,2021-09-01 This book provides IT professionals educators researchers and students a compendium of knowledge on smart sensors and devices types of sensors data analysis and monitoring with the help of smart sensors decision making impact of machine learning algorithms and artificial intelligence related methodologies for data analysis and understanding of smart applications in networks Smart sensor networks play an important role in the establishment of network devices which can easily interact with physical world through plethora of variety of sensors for collecting and monitoring the surrounding context and allowing environment information Apart from military applications smart sensor networks are used in many civilian applications nowadays and there is a need to manage high volume of demands in related applications This book comprises of 9 chapters and presents a valuable insight on the original research and review articles on the latest achievements that contributes to the field of smart sensor networks and their usage in real life applications like smart city smart home e healthcare smart social sensing networks etc Chapters illustrate technological advances and trends examine research opportunities highlight best practices and standards and discuss applications and adoption Some chapters also provide holistic and multiple perspectives while examining the impact of smart sensor networks and the role of data analytics data sharing and its control along with future prospects

Unveiling the Magic of Words: A Overview of "**Algorithm For Gsm Based On Home Automation**"

In some sort of defined by information and interconnectivity, the enchanting power of words has acquired unparalleled significance. Their power to kindle emotions, provoke contemplation, and ignite transformative change is really awe-inspiring. Enter the realm of "**Algorithm For Gsm Based On Home Automation**," a mesmerizing literary masterpiece penned with a distinguished author, guiding readers on a profound journey to unravel the secrets and potential hidden within every word. In this critique, we shall delve in to the book is central themes, examine its distinctive writing style, and assess its profound affect the souls of its readers.
