Complex, Intelligent and Software Intensive Systems Leonard Barolli, 2022-06-16 Software intensive systems are systems which heavily interact with other systems sensors actuators devices other software systems and users More and more domains are involved with software intensive systems e g automotive telecommunication systems embedded systems in general industrial automation systems and business applications Moreover the outcome of web services delivers a new platform for enabling software intensive systems Complex systems research is focused on the overall understanding of systems rather than its components Complex systems are very much characterized by the changing environments in which they act by their multiple internal and external interactions They evolve and adapt through internal and external dynamic interactions The development of intelligent systems and agents which is each time more characterized by the use of ontologies and their logical foundations builds a fruitful impulse for both software intensive systems and complex systems Recent research in the field of intelligent systems robotics neuroscience artificial intelligence and cognitive sciences is a very important factor for the future development and innovation of software

intensive and complex systems The aim of the book Complex Intelligent and Software Intensive Systems is to deliver a platform of scientific interaction between the three interwoven challenging areas of research and development of future ICT enabled applications software intensive systems complex systems and intelligent systems Managing Business Complexity Michael J. North, Charles M. Macal, 2007-03-01 Agent based modeling and simulation ABMS a way to simulate a large number of choices by individual actors is one of the most exciting practical developments in business modeling since the invention of relational databases It represents a new way to understand data and generate information that has never been available before a way for businesses to view the future and to understand and anticipate the likely effects of their decisions on their markets and industries It thus promises to have far reaching effects on the way that businesses in many areas use computers to support practical decision making Managing Business Complexity is the first complete business oriented agent based modeling and simulation resource It has three purposes first to teach readers how to think about ABMS that is about agents and their interactions second to teach readers how to explain the features and advantages of ABMS to other people and third to teach readers how to actually implement ABMS by building agent based simulations It is intended to be a complete ABMS resource accessible to readers who haven't had any previous experience in building agent based simulations or any other kinds of models for that matter It is also a collection of ABMS business applications resources all assembled in one place for the first time In short Managing Business Complexity addresses who needs ABMS and why where and when ABMS can be applied to the everyday business problems that surround us and how specifically to build these powerful agent based models
