Language Learning Review:

Formative assessment in second language learning: a systematic review and an annotated bibliography Skevi Vassiliou, Salomi Papadima-Sophocleous, Christina Nicole Giannikas, 2022-11-21 Throughout its whole history most research conducted in language assessment refers to testing It is only since 2000 that language formative assessment started being recorded in research publications This book tells the story of language formative assessment in two ways the one complementing the other in the forms of a systematic review and a descriptive and evaluative annotated bibliography from the very first published work on the subject in 2000 to 2020 While the systematic review gives the story of language formative assessment in a chronological order and gives an overview of different aspects the annotated bibliography gives more details for research work published the main purposes of the book are to 1 give a substantial background in the area 2 describe how this topic has been approached 3 contribute to the development of critical thinking 4 help in establishing the relevance and quality of the annotated material and 5 facilitate language formative researchers as well as practitioners to form an overview of the research in the area during the specific period under study The book may be of interest to language practitioners researchers teacher trainers and policy makers The authors hope that the present publication will be viewed as a valuable contribution to the history of language formative assessment *The ERIC Review*, 1991 Provides information on programs research publications and services of ERIC as well as critical and current education information

Effective Language Learning Suzanne Graham, 1997 This book investigates some of the learning processes of students of French and German as they begin language learning at an advanced level a stage which is frequently problematic By looking at the learning strategies employed by both successful and less successful language students the author elucidates some of the key cognitive and affective processes which facilitate advanced level language learning The implications of this for the classroom are discussed in detail leading to practical recommendations for learning and teaching strategies A central theme is the need to teach explicitly the proficient use of learning strategies and suggestions are made as to how this may be achieved in the language classroom
