AQA Mathematics Bob Hartman, 2006 Written by examiners and practising teachers this work offers study and homework support throughout GCSE It is useful as a reference source a lesson back up and a revision guide *United States Army Training Manual* United States. Adjutant-General's Office, 1925 *Lessons from Problem-based Learning* H. J. M. van Berkel, 2010 Problem based learning PBL has excited interest among educators around the world for several decades Among the most notable applications of PBL is the approach taken at the Faculty of Health Medicine and Life sciences FHML at Maastricht University the Netherlands Starting in 1974 as a medical school the faculty embarked on the innovative pathway of problem based learning trying to establish a medical training program which applied recent insights of education which would be better adapted to the needs of the modern physician The medical school currently part of the FHML can be considered as an established school where original innovations and educational changes have become part of a routine The first book to bring this wealth of information together *Lessons from Problem based Learning* documents those findings and shares the experiences of those involved to encourage further debate and refinement of problem based learning in specific applications elsewhere and in general educational discussion and thought Each chapter provides a description of why and what has been done in the Maastricht program followed by reflection on the benefits and issues that have arisen for these developments The final section of the book examines the application of PBL in the future and how it is likely to develop further Software Engineering with Computational Intelligence Taghi M. Khoshgoftaar, 2012-12-06 The constantly evolving technological infrastructure of the modern world presents a great challenge of developing software systems with increasing size complexity and functionality The software engineering field has seen changes and innovations to meet these and other continuously growing challenges by developing and implementing useful software engineering methodologies Among the more recent advances are those made in the context of software portability formal verification techniques software measurement and software reuse However despite the introduction of some important and useful paradigms in the software engineering discipline their technological transfer on a larger scale has been extremely gradual and limited For example many software development organizations may not have a well defined software assurance team which can be considered as a key ingredient in the development of a high quality and dependable software product Recently the software engineering field has observed an increased integration or fusion with the computational intelligence CI field which is comprised of primarily the mature technologies of fuzzy logic neural networks genetic algorithms genetic programming and rough sets Hybrid systems that combine two or more of these individual technologies are also categorized under the CI umbrella Software engineering is unlike the other well founded engineering disciplines primarily due to its human component designers developers testers etc factor The highly non mechanical and intuitive nature of the human factor characterizes many of the problems associated with software engineering including those observed in development effort
