MODULE – 1**DEMAND AND LAW OF
DEMAND****Meaning of Demand**

The demand for any commodity, at a given price, is the quantity of it which will be bought per unit, of time at the price. From this definition of demand two things are quite clear:

Firstly, demand always refers to demand at a price. If demand is not related to price, it conveys no sense. To say that the demand for mangoes is 100 kgs. fails to convey any sense. It should be always related to price. Again in the words of Sheaman, "To speak of the demand of a commodity in the sense of the mere amount that will be purchased without reference to any price will be meaningless."

Secondly, demand always means demand per unit of time. The time may be a day, a week or a month, etc.
