Adams, Cassandra LaFleur Villarreal, 2020-05-06 Urban Deer Havens consists of a thorough examination of selected cervid deer species that are known to inhabit urban communities in the United States The deer species that are included in this presentation consisted of white tailed *Odocoileus virginianus* Key deer *O v clavium* moose *Alces alces* elk *Cervus elaphus* mule *Odocoileus hemionus* and black tailed deer *O h columbianus* This book is the first attempt to examine the similarities and differences in those factors that allow the selected cervids to exist and thrive in urban habitats This information has never been collected collated reviewed and published under one cover document Yet all five are known to inhabit urban communities within their geographic range The lack of information concerning several important examples of urban cervids in conjunction with a proliferation of information on white tailed deer only is an incomplete and biased
