The University under Pressure Elizabeth Popp Berman, Catherine Paradeise, 2016-02-26 Universities are under pressure Their resource environment is evolving demands for accountability have increased and demographic shifts are changing higher educational needs This volume provides a cross national picture of how the university as an organization is reacting to adapting to and threatened by a period of intense pressure University Commons Divided Peter MacKinnon, 2018-01-01 Investigating issues of university governance in Canada University Commons Divided analyzes several major cases at the university level that have come to exemplify infringements on the freedom of expression *Evolution of Organismal Form: From Regulatory Interactions to Developmental Processes and Biological Patterns* Sylvain Marcellini, Hector Escriva, 2017-02-14 Today s biodiversity is the spectacular product of hundreds of millions of years of evolution Understanding how this diversity of living organisms appeared is one of the most intriguing and challenging question in biology Because organismal morphology is established during embryonic development and because morphological traits diversified from ancestral forms during evolution it can be inferred that changes in the mechanisms controlling embryonic development are instrumental for morphological evolution This syllogism lies at the very heart of a new discipline called Evo Devo which is centered in the identification of the cellular and genetic mechanisms that through modifications in developmental programmes were at the base of morphological innovations during evolution After the discovery of the broad conservation of gene content and regulatory networks in the animal kingdom as well as in plants Evo Devo is orienting towards the study of differences through experimental and functional approaches Given the wide range of species gene families and developmental processes considered a concerted effort is still required to shed light on the genetic cellular and molecular mechanisms involved in phenotypic evolution It is a particularly exciting time for this field of evolutionary developmental biology as the advent of novel imaging genome editing and sequencing technologies allows the study of almost any organism in ways that were unthinkable only a few years ago Therefore the aim of this Frontiers Research Topic is to gather an original collection of experimental approaches concepts and hypotheses reflecting the current diversity of the Evo Devo field We have organized the articles according to the mechanistic depth with which they tackle specific evolutionary issues Hence comparisons of expression patterns have been grouped in Chapter 1 changes in regulatory interactions and gene networks are presented in Chapter 2 while Chapter 3 focuses on the evolution of developmental processes and biological patterns Indigenous Oral History Manual Winona Wheeler, Charles E.
