Imposing Regulation on Advanced Algorithms Fotios Fitsilis, 2019-09-03 This book discusses the necessity and perhaps urgency for the regulation of algorithms on which new technologies rely technologies that have the potential to re shape human societies From commerce and farming to medical care and education it is difficult to find any aspect of our lives that will not be affected by these emerging technologies At the same time artificial intelligence deep learning machine learning cognitive computing blockchain virtual reality and augmented reality belong to the fields most likely to affect law and in particular administrative law The book examines universally applicable patterns in administrative decisions and judicial rulings First similarities and divergence in behavior among the different cases are identified by analyzing parameters ranging from geographical location and administrative decisions to judicial reasoning and legal basis As it turns out in several of the cases presented sources of general law such as competition or labor law are invoked as a legal basis due to the lack of current specialized legislation This book also investigates the role and significance of national and indeed supranational regulatory bodies for advanced algorithms and considers ENISA an EU agency that focuses on network and information security as an interesting candidate for a European regulator of advanced algorithms Lastly it discusses the involvement of representative institutions in algorithmic regulation

Comparative Consumer Sales Law Geraint Howells, Christian Twigg-Flesner, Hans-W. Micklitz, Chen Lei, 2017-12-06 For many years legislators around the world have responded to the particular needs of consumers by introducing dedicated rules for consumer sales contracts In the European

Union a significant push came through the adoption of the Consumer Sales Directive 99/44/EC. Elsewhere in the world legislation focusing on consumer sales contracts has been introduced for example in New Zealand and Australia. This book offers a snapshot of the current state of consumer sales law in a range of jurisdictions around the globe. It provides both an overview of the law in selected jurisdictions and compares the application of these rules in the context of two case scenarios.

Environmental and Natural Resource Economics Tom Tietenberg, Lynne Lewis, 2018-03-13. *Environmental and Natural Resource Economics* is the best selling text for natural resource economics and environmental economics courses offering a policy oriented approach and introducing economic theory and empirical work from the field. Students will leave the course with a global perspective of both environmental and natural resource economics and how they interact. Complemented by a number of case studies showing how underlying economic principles provided the foundation for specific environmental and resource policies, this key text highlights what can be learned from the actual experience. This new 11th edition includes updated data, a number of new studies and brings a more international focus to the subject. Key features include: Extensive coverage of the major issues including climate change, air and water pollution, sustainable development and environmental justice. Dedicated chapters on a full range of resources including water, land, forests, fisheries and recyclables. Introductions to the theory and method of environmental economics including externalities, benefit cost analysis, valuation methods and ecosystem goods and services. Boxed Examples and Debates throughout the text which highlight global examples and major talking points. The text is fully supported with end of chapter summaries, discussion questions and self test exercises in the book and multiple choice questions, simulations, references, slides and an instructor's manual on the Companion Website.
