The Routledge Handbook of Poverty in the Global South Rajendra Baikady, John Gal, Varoshini Nadesan, Sajid S.M., Gao Jianguo, 2023-12-01 This handbook initiates fresh debates on poverty and its impact in a constantly changing Global South society. It studies the concept, theories and causes of poverty as well as the design and delivery of social welfare policies related to specific groups such as women, children and the elderly. The chapters are theoretical, evidence-based and empirical in nature and bring together a holistic understanding of social problems and issues in developing countries. The volume brings together researchers, educators and practitioners from across the globe to develop a hands-on reference work that will be requisite for several social science disciplines concerned with poverty and the welfare of poor people. The first of its kind, the handbook will be indispensable for scholars and researchers of development studies, economics, social work, political studies, poverty studies, population and demographic studies, sociology, social anthropology, public policy and political economy, especially those concerned with the Global South.

Handbook of Bioplastics and Biocomposites Engineering Applications Srikanth Pilla, 2011-07-20 This Handbook is the first to explore the extensive applications made with bioplastics. Civil Engineering, Biomedical, Automotive, General Engineering. The majority of the chapters review the properties, processing, characterization, synthesis and applications of the bio-based and biodegradable polymers and composites including Polymers such as polylactic acid (PLA), polyhydroxybutyrate (PHB), guar gum-based plastics, cellulose polyesters, starch-based bioplastics, vegetable oil-derived bioplastics, biopolyethylene, chitosan, etc. Thermoplastic and thermosetting bioplastics and biocomposites with a focus on the automobile industry. The ways how to improve the properties of bioplastics, polymer blends and biocomposites by combining them with both synthetic and natural fillers and reinforcements such as nanoclays, nanotubes, CNTs and natural fibers, both wood and plant fibers. Studies that expand the boundaries of bioplastics that will allow for the new materials to be applied to most generic engineering applications. The Handbook will be of central interest to engineers, scientists and researchers who are working in the fields of bioplastics, biocomposites, biomaterials for biomedical engineering, biochemistry and materials science. The book will also be of great importance to engineers in many industries including automotive, biomedical, construction and food packaging.

Emerging Role of Lipids in Metabolism and Disease Marco Segatto, Valentina Pallottini, 2021-04-01 Even though initially considered as a passive means for storing energy lipids are now regarded as multifaceted molecules with crucial structural and functional activities For instance some of them play essential roles as key components of cell membranes whereas others act as signaling molecules in the regulation of cell homeostasis In recent years lipid research has attracted increasing interest because of the

involvement of this class of compounds in human health Indeed a plethora of pathological conditions are characterized by alterations in lipid metabolism such as cardiovascular diseases and brain disorders This Special Issue is a collection of papers from different experts in lipid research with the aim of providing new insights into the physiopathological involvement of lipids and their impact on human health This collection also demonstrates the usefulness of interdisciplinary approaches in the development of novel methods to study and manipulate lipid metabolism which may represent an attractive target for designing effective therapeutic strategies to counteract numerous pathologies

Lost and Othered Children in Contemporary Cinema Debbie C. Olson, Andrew Scahill, 2012-05-18 Children have been a part of the cinematic landscape since the silent film era yet children are rarely a part of the theoretical landscape of film analysis *Lost and Othered Children in Contemporary Cinema* edited by Debbie C Olson and Andrew Scahill seeks to remedy that oversight Throughout the over one hundred year history of cinema the image of the child has been inextricably bound to filmic storytelling and has been equally bound to notions of romantic innocence and purity This collection reveals however that there is a body of work that provides a counter note of darkness to the traditional portraits of sweetness and light Particularly since the mid twentieth century there are a growing number of cinematic works that depict childhood as a site of knowingness despair sexuality death and madness *Lost and Othered Children in Contemporary Cinema* challenges notions of the innocent child through an exploration of the dark side of childhood in contemporary cinema The contributors to this multidisciplinary study offer a global perspective that explores the multiple conditions of marginalized childhood as cinematically imagined within political geographical sociological and cultural contexts

Silver-Based Antimicrobials Raymond J. Turner,2021-02-22 There is some talk about an antibiotic Armageddon due to quickly developing resistance towards commercially available antibiotics For the most part the classical antibiotic pipeline has dried up and antibiotic resistance to any new drugs quickly develops It is here that metal based antimicrobials can step forward as possible solutions in this antimicrobial resistance era The biological targets of metal atoms are more diverse thus making it more difficult for bacteria to develop resistance compared with

classical antibiotics The metal silver has been used since antiquity for wound healing and water purification At present it is the most prevalent antimicrobial metal used in healthcare industry and consumer products Silver is being used in the form of ionic salt colloids or in specific nanomaterials and as described in this book it can be applied as mixtures with other antimicrobials or coating composites The different formulations are explored for their efficacy against a variety of problems related to agricultural and medical infections Whilst by no means exhaustive this book nicely highlights the present directions in silver based antimicrobial research and antimicrobial formulation development The chapters have been organized from a general introductory review to approaches of mixing other antimicrobials and materials to enhance silver performance This is followed by synthetic approaches First are biogenic sometimes called green or eco friendly approaches followed by advanced physical chemical synthetic approaches The book ends with an overview of applications through a review of patents over the past 10 years

Visions of Amen Stephen Schloesser, 2014-07-10 French composer Olivier Messiaen 1908 1992 is probably best known for his Quartet for the End of Time premiered in a German prisoner of war camp in 1941 However Messiaen was a remarkably complex intelligent person with a sometimes tragic domestic life who composed a wide range of music This book explores the enormous web of influences in the early part of Messiaen's long life The first section of the book provides an intellectual biography of Messiaen's early life in order to make his difficult music more accessible to the general listener The second section offers an analysis of and thematic commentaries on Messiaen's pivotal work for two pianos Visions of Amen composed in 1943 Schloesser's analysis includes timing indications corresponding to a downloadable performance of the work by accomplished pianists Stphane Lemelin and Hyesook Kim
