medical progress in the nineteenth century Steven M Stowe provides an in depth study of the midcentury culture of everyday
medicine in the South Reading deeply in the personal letters daybooks diaries bedside notes and published writings of
doctors Stowe illuminates an entire world of sickness and remedy suffering and hope and the deep ties between medicine
and regional culture In a distinct American region where climate race and slavery and assumptions about southernness
profoundly shaped illness and healing in the lives of ordinary people Stowe argues that southern doctors inhabited a world of
skills medicines and ideas about sickness that allowed them to play moral as well as practical roles in their communities
Looking closely at medical education bedside encounters and medicine s larger social aims he describes a country orthodoxy
of local social medical practice that highly valued the art of medicine While not modern in the sense of laboratory science a
century later this country orthodoxy was in its own way modern Stowe argues providing a style of caregiving deeply rooted in
individual experience moral values and a consciousness of place and time **The Athenaeum** ,1859 *The London
