

Geography

Egypt is located in northeastern Africa and borders the Red Sea

The Nile is a 6,800 km long river that flows north to the sea

The ancient Egyptian civilization was dependent on the annual flooding of the Nile

The flooding allowed farmers to grow crops of wheat and barley in lush conditions that the land could not

They used 2.5 m of water in Egypt each year. Without the flooding, Egypt would be a complete desert

Irrigation and Protection

Canals to floodwaters, ditches and irrigation systems

Egyptians used a system of canals and ditches to control the flow of water and protect the crops

They built walls to manage the flow of water and to protect the crops
