and Ethics Angus Taylor, 2003-05-12 A previous edition of this book appeared under the title Magpies Monkeys and Morals The new edition has been updated throughout Substantial new material has been added to the text including discussions of virtue ethics and Rawlsian contractarianism The bibliography has been significantly enlarged and now includes more than five hundred entries **BOOK JACKET** **Pet Politics** Susan Hunter, Richard A. Brisbin, 2016-02-15 Although scholars in the disciplines of law psychology philosophy and sociology have published a considerable number of prescriptive normative and theoretical studies of animals in society Pet Politics presents the first study of the development of companion animal or pet law and policy in Canada and the United States by political scientists The authors examine how people and governments classify three species of pets or companion animals cats dogs and horses for various degrees of legal protection They then detail how interest groups shape the agenda for companion animal legislation and regulation and the legislative and administrative formulation of anticruelty kennel licensing horse slaughter feral and roaming cat and breed ban policies Finally they examine the enforcement of these laws and policies by agencies and the courts Using an eclectic mix of original empirical data original case studies and interviews and relying on general theories and research about the policy process and the sociopolitical function of legality the authors illustrate that pet policy is a unique field of political struggle a conflict that originates from differing perspectives about whether pets are property or autonomous beings and clashing norms about the care of animals The result of the political struggle the authors argue is difficulty in the enactment of policies and especially in the implementation and enforcement of laws that might improve the welfare of companion animals *Animals Matter* Marc Bekoff, 2007-11-13 Nonhuman animals have many of the same feelings we do They get hurt they suffer they are happy and they take care of each other Marc Bekoff a renowned biologist specializing in animal minds and emotions guides readers

from high school age up including older adults who want a basic introduction to the topic in looking at scientific research philosophical ideas and humane values that argue for the ethical and compassionate treatment of animals Citing the latest scientific studies and tackling controversies with conviction he zeroes in on the important questions inviting reader participation with thought experiments and ideas for action Among the questions considered Are some species more valuable or more important than others Do some animals feel pain and suffering and not others Do animals feel emotions Should endangered animals be reintroduced to places where they originally lived Should animals be kept in captivity Are there alternatives to using animals for food clothing cosmetic testing and dissection in the science classroom What can we learn by imagining what it feels like to be a dog or a cat or a mouse or an ant What can we do to make a difference in animals quality of life Bekoff urges us not only to understand and protect animals especially those whose help we want for our research and other human needs but to love and respect them as our fellow beings on this planet that we all want to share in peace

Why Animal Suffering Matters Andrew Linzey, 2013-11-01 How we treat animals arouses strong emotions Many people are repulsed by photographs of cruelty to animals and respond passionately to how we make animals suffer for food commerce and sport But is this as some argue a purely emotional issue Are there really no rational grounds for opposing our current treatment of animals In *Why Animal Suffering Matters* Andrew Linzey argues that when analyzed impartially the rational case for extending moral solicitude to all sentient beings is much stronger than many suppose Indeed Linzey shows that many of the justifications for inflicting animal suffering in fact provide grounds for protecting them Because animals the argument goes lack reason or souls or language harming them is not an offense Linzey suggests that just the opposite is true that the inability of animals to give or withhold consent their inability to represent their interests their moral innocence and their relative defenselessness all compel us not to harm them Andrew Linzey further shows that the arguments in favor of three controversial practices hunting with dogs fur farming and commercial sealing cannot withstand rational critique He considers the economic legal and political issues surrounding each of these practices appealing not to our emotions but to our reason and shows that they are rationally unsupportable and morally repugnant In this superbly argued and deeply engaging book Linzey pioneers a new theory about why animal suffering matters maintaining that sentient animals like infants and young children should be accorded a special moral status

People Promoting and People Opposing Animal Rights John M. Kistler, 2002-11-30 What is the difference between animal rights and animal welfare What inspires people to take on the different causes of non human animals How do people vary in their views on the rights of animals Students will be encouraged to think critically as they discover there are no black and white answers to these and other questions This fascinating collection of profiles is written by and about those who are actively involved in the pro con aspects of the animal rights and animal welfare movements Over 35 individual stories written by those who are on the frontlines fighting for what they believe bring the controversies surrounding animal rights and welfare into sharp focus The same interview questions

were asked of each participant Readers will enjoy the personal element of these profiles while discovering the similarities and differences among those involved in these movements An introduction to the volume provides students with the definitions and background information they need to clearly understand the entries that follow and to encourage them to question what they read and to draw their own conclusions Ethical and Socially Responsible Investment Dominic Broadhurst,Janette Watson,Jane Marshall,2005-05-15 Dieses neue Nachschlagewerk pr sentiert mehr als 500 Informationsquellen zum Thema ethisch und sozial verantwortliche Investitionen Es wendet sich an Informationsspezialisten die im Bereich Wirtschaftsinformationen f r den privaten wie ffentlichen Sektor t tig sind Der Titel ist f r alle die mit Investitionsmanagement betraut sind oder relevante Informationen zu diesem Gebiet ben tigen eine unsch tzbare Quelle aktueller Daten handelt es sich doch um das umfangreichste Nachschlagewerk das bislang zu diesem Thema ver ffentlicht wurde Das Buch deckt alle zentralen Bereiche innerhalb der sozial verantwortlichen Investitionen SRI ab Umwelt Menschenrechte Arbeitsbedingungen Tierschutz R stungsfragen Lebensmittelsicherheit sexuelle Ausbeutung Gesundheit Sicherheit und Tabak Die Informationsquellen zu jedem dieser Aspekte wurden einzeln ausgesucht gr ndlich hinsichtlich der behandelten Themen analysiert und bewertet sowie mit vollst ndigen Kontaktangaben versehen Das Spektrum der Quellen reicht von B chern und Zeitschriften zu Websites und professionellen Einrichtungen Der konkurrenzlose und benutzerfreundlich gestaltete Titel bietet allen die im Bereich ethisch und sozial verantwortlicher Investitionen t tig sind eine Auswahl der besten einschl gigen Informationsquellen Against the Grain ,2001 *Contemporary Issues in Bioethics* Tom L. Beauchamp,2003 This anthology represents all of the most important points of view on the most pressing topics in bioethics Containing current essays and actual medical and legal cases written by outstanding scholars from around the globe this book provides readers with diverse range of standpoints including those of medical researchers and practitioners legal exerts and philosophers **The SAGE Encyclopedia of Terrorism, Second Edition** Gus Martin,2011-06-15 Six years after publication of the first edition of the best selling Encyclopedia of Terrorism much has changed on the national security scene Despite the dark promises of Osama bin Laden following the 9 11 attacks the United States has not experienced any major domestic terror incidents Al Qaeda itself is believed to be a severely crippled organization But while U S wars in Afghanistan and Iraq not to mention the arrival of the Obama administration a new balance of power within Congress and an increasingly fragile economic picture have significantly affected the national security picture the threat of economic chaos and massive loss of life due to terror attacks has not abated Indeed in July 2008 analysts pointed out that even a relatively small terrorist organization could present a dire threat with some experts arguing that a biological chemical or even nuclear attack on a major U S city is all but inevitable In this highly charged rapidly shifting environment we are pleased to present the The SAGE Encyclopedia of Terrorism Second Edition a thoroughly updated and expanded edition of the original highly regarded reference work Nearly 100 000 words of new material will be added along with fully updated

original entries and expanded coverage New introductory essays will explore the impact of terrorism on economics public health religion and even pop culture Ethical issues such as the role of torture in interrogations competing notions of security versus liberty and the debates over FISA legislation and Guantanamo Bay will also be covered Two dozen entries on significant recent events such as the London bombings Chechen attacks on Russian interests and the rescue of Ingrid Bettancourt and some 60 additional new entries will restore the work as an up to the minute natural first stop for researchers

Animal Ethics and the Autonomous Animal Self Natalie Thomas, 2016-10-26 This book presents a radical and intuitive argument against the notion that intentional action agency and autonomy are features belonging only to humans Using evidence from research into the minds of non human animals it explores the ways in which animals can be understood as individuals who are aware of themselves and the consequent basis of our moral obligations towards them The first part of this book argues for a conception of agency in animals that admits to degrees among individuals and across species It explores self awareness and its various levels of complexity which depend on an animals other mental capacities The author offers an overview of some established theories in animal ethics including those of Peter Singer Tom Regan Bernard Rollin and Lori Gruen and the ways these theories serve to extend moral consideration towards animals based on various capacities that both animals and humans have in common The book concludes by challenging traditional Kantian notions of rationality and what it means to be an autonomous individual and discussing the problems that still remain in the study of animal ethics
