grounded in a broad cross regional and transcultural perspective explores the cultural contexts generative mechanisms artistic forms and ontological characteristics of art globally It examines the complex interactions between diverse cultures and artistic traditions offering insights into how these relationships have shaped artistic expression throughout history The book is organized into three key sections The Methodological Perspectives section highlights an integrated transcultural approach to art history merging Eurasian art histories to present a holistic view Ornament Object and Material Culture focuses on micro level case studies within material culture particularly along the Silk Road revealing how foreign decorative styles and motifs merged with local traditions over time The final section Book Reviews evaluates recent influential publications in transcultural art history and cultural studies As the first book globally to explicitly identify itself as a study of the Transcultural History of Art it presents groundbreaking research that moves beyond traditional nation based narratives of art history It introduces innovative methodologies and offers detailed case studies demonstrating the practical application of transcultural approaches contributing to a deeper understanding of global artistic exchanges and the shared construction of human cultural heritage

Understanding Body Shapes of Animals Holger Preuschoft, 2022-06-28 This book discusses how and why animals evolved into particular shapes The book identifies the physical laws which decide over the evolutionary selective value of body shape and morphological characters Comparing the mechanical necessities with morphological details the author attempts to understand how evolution works and which sorts of limitations are set by selection The book explains morphological traits in more biomechanical detail without getting lost in physics or in methods Most emphasis is placed on the proximate question namely the identification of the mechanical stresses which must be sustained by the respective body parts when they move the body or its parts against resistance In the first part of the book the focus is on primitive animals and later on the emphasis shifts to highly specialized mammals Readers will learn more about living and fossil animals A section of the book is dedicated to human evolution but not to produce another evolutionary tree nor to refine a former one but to contribute to answering the question WHY early humans have developed their particular body shape
