genders explaining why women suffer higher rates of depression and anxiety than men but are also more inclined to express positive emotions The book also makes international comparisons finding that some countries populations report higher levels of happiness than others The contributors deploy an array of methods from the surveys and questionnaires of social science to psychological and physiological experiments to develop a comprehensive new approach to the study of well being They show how the sensory pleasures of the body can tell us something about the higher pleasures of the mind and even how the effectiveness of our immune system can depend upon the health of our social relationships *Sixth Message Understanding Conference, (MUC-6)* ,1995 **The American Bookseller** ,1890 Advances in Artificial Intelligence -- IBERAMIA 2012 Juan Pavón,Néstor D.
