Seagull Theatre Quarterly ,1998 Grace and Gravity Lars Spuybroek,2020-11-26 How do we live well The first sentence of Grace and Gravity raises the fundamental question that constantly occupies our minds and of all those who lived before us Paradoxically the impossibility of answering this question opens up the very room needed to find ways of living well It is the gap where all disciplines fall short where architecture does not fit its inhabitants where economy is not based on shortage where religion cannot be explained by its followers and where technology works far beyond its own principles According to Lars Spuybroek the prize winning former architect this marks the point where the paradoxical machine of grace reveals its powers a point where we cannot say if we are moving or being moved Following the trail of grace leads him to a new form of analysis that transcends the age old opposition between appearances and technology Linking up a dazzling and often delightful variety of sources monkeys paintings lamp posts octopuses tattoos bleeding fingers rose windows robots smart phones spirits saints and fossils with profound meditations on living death consciousness and existence Grace and Gravity offers an eye opening provocation to a wide range of art historians architects theologians anthropologists artists media theorists and philosophers

Beyond the Innocence of Childhood: Helping children and adolescents cope with life-threatening illness and dying David Walter Adams,Eleanor J. Deveau,1995 Death is not a mere possibility but a certainty for all of us Yet today s society unrealistically portrays childhood as a time of unremittant joy and freedom Unfortunately the reality of life may suddenly bring children face to face with tragic circumstances such as the death of their pet the terminal illness of their parent their own struggle with life threatening disease the accidental death of their sibling or the suicide of a friend The gravity of any of these situations takes children beyond the innocence of childhood and plunges them into a world that is frightening and full of uncertainty Unfortunately our perceptions and attitudes toward death do not equip children with the tools to help them cope adequately with such overwhelming experiences Beyond the Innocence of Childhood is a collection of forty chapters which are divided into three separate volumes The overall purpose of this series is to answer the question How do we as educators clinicians other professionals and parents help children and adolescents deal with threat to their lives dying death and bereavement In this three volume set the editors have brought together a number of well known educators researchers and practitioners who share their knowledge and expertise concerning the care and well being of children and adolescents

kinematic thinking from Archytas to the Aristotelian Mechanics She shows the influence of kinematic thinking on Aristotle's concept of power or potentiality which she sees as having a physicalistic meaning originating in the problem of movement De Groot identifies the source of early mechanical knowledge in kinesthetic awareness of mechanical advantage showing the relation of Aristotle's empiricism to more ancient experience The book sheds light on the classical Greek understanding of imitation and device as it questions both the claim that Aristotle's natural philosophy codifies opinions held by convention and the view that the cogency of his scientific ideas depends on metaphysics **Annual Editions: Early Childhood**
