

15. Figure 13 shows a different, more complex case of the dynamics of the system when the conditions that give rise to the cycle and the conditions that control the cycle overlap.

Figure 11.20 is a recording of a single-channel section of the brain, taken at the same time as Figure 11.19, but with the electrode contacts moved to other cortical areas. Notice how the brain waves appear to be coming from a different location. The timing, amplitude, and the underlying frequency appear to be identical. (Figure 11.20 is a recording of a single channel from a different area.)
