Motoring the Future Engelbert Wimmer, 2011-11-30 The crisis in the auto industry has resulted in a race between Volkswagen as challenger and Toyota as tattered global market leader. Whether it is the German or the Japanese firm that takes pole position, the winner will change the balance of power in the automotive industry and lead the way to the automobiles of the future. London and the Politics of Memory Stuart Burch, 2019-07-09 This book provides an original, impassioned exploration of memory studies and the uses of the past in the present. It capitalises on London's global appeal and Big Ben's iconic status. Moving beyond this familiar facade, the reader will journey around the hidden histories of Westminster's streets, squares and statues. This tangible heritage supports a diversity of contested memories. The rationale for this approach is that by linking theory with empirical examples, it becomes possible to tackle complex issues in a grounded, accessible manner. Readers will be encouraged to use this case study as a framework for addressing the politics of memory in their own lives, as well as in other places, not just in Britain but around the world. This book will be of interest to scholars and students from a wide variety of disciplines, including but not limited to sociology, culture and media studies, English literature, film and television studies, global studies, heritage studies, history, politics and human geography. **Smích v televizní**
