Journal of the American Veterinary Medical Association American Veterinary Medical Association, 2016 **Exploration and Production of Oceanic Natural Gas Hydrate** Michael D. Max, Arthur H. Johnson, 2016-08-16 This book describes aspects of the natural gas hydrate NGH system that offer opportunities for the innovative application of existing technology and development of new technology that could dramatically lower the cost of NGH exploration and production. It is written for energy industry professionals and those concerned with energy choices and efficiencies at a university graduate level. The NGH resource is compared with physical environmental and commercial aspects of other gas resources. The authors' theme is that natural gas can provide for base and peak load energy demands during the transition to and possibly within a renewable energy future. This is possibly the most useful book discussing fossil fuels that will be a reference for environmentalists and energy policy institutions and for the environmental and energy community. *Novel Biological*
