2015 Victory Service Manual:

The Airborne Mafia Robert F. Williams, 2025-03-15 The Airborne Mafia explores how a small group of World War II airborne officers took control of the US Army after World War II. This powerful cadre cemented a unique airborne culture that had an unprecedented impact on the Cold War US Army and beyond. Robert F. Williams reveals the trials and tribulations this group of officers faced in order to bring about their vision. He spotlights the relationship between organizational culture, operational behavior, and institutional change in the United States Army during the Cold War, showing that as airborne officers ascended to the highest ranks of the army, they transmitted their culture throughout their service in four major ways: civil-military relations, preparation for potential atomic combat, helicopter airmobility, and strategic response forces. Experiences of training and commanding airborne divisions in World War II led these men to hold sway in army doctrine by the mid-1950s. Dominating institutional thought and imparting their values, beliefs, and norms throughout the service, they enjoyed a special privilege within the group culture. Williams demonstrates this impact and power by focusing on the paratrooper triumvirate of Matthew Ridgway, Maxwell Taylor, and James Gavin, and the lasting impression they made on how the US Army fought. The Airborne Mafia illuminates the power subcultures can have in changing their parent cultures over time, particularly one as set in its ways and as large as the US Army. With a deft touch, deep research, and an unwavering eye for the human stories behind organizational change, Williams helps explain the existence and importance of the paratrooper mystique that remains within the military still today.

Sub Hunters Anthony Cooper, 2021-01-29 Excellent photographs from the Australian War Memorial collection. Dramatic air battles over a turbulent sea, hundreds of miles from land, and without hope of rescue. Striking U-boat kills as concrete proof of operational successes. Beautifully illustrated with many rare and unpublished photographs. Of interest to aviation and military historians, modellers, gamers, and flight simulator enthusiasts. 1943 was the turning point in the Battle of the Atlantic when forces, technologies, and tactics turned against Germany's U-boats. The victory not only secured Britain's trans-Atlantic lifeline to the United States but also enabled the vast build-up in military forces in Britain necessary to launch D-Day in 1944. The Allied battle to defeat the U-boat menace was a combined effort by the naval and air forces of several Allied nations, and this is the story of one part during the decisive mid-war period. Nos 10 and 461 Squadrons of the Royal Australian Air Force flew Sunderland flying boats from bases in Wales and Devon as part of RAF Coastal Command; these two squadrons flew long-range daylight missions over the eastern Atlantic, patrolling Britain's southwest approaches. They hunted and killed U-boats transiting between their mid-Atlantic hunting grounds and their bases in Bordeaux, and fought furious air battles over the Bay of Biscay against Luftwaffe Ju 88 long-range fighters tasked specifically with shooting them down. These two Australian squadrons established a combat record.
