

READING: Climate change solutions

The Earth is getting warmer, and if the trend continues, humans may have some serious problems. Most of us are aware of the need for recycling and driving less, but what other ideas are the experts considering?

Man-made trees?

According to climate experts, one big problem we have right now is too much CO₂ in the air. If we can put CO₂ into the air, can we take it back out? At the moment, trees do this job – just not fast enough. So could we make tree-like machines to do the job? Scientist Klaus Lackner of Columbia University in New York says yes and several companies are already developing the idea.

Smarter power for vehicles?

- Electric cars are more and more common all over the world, and the technology is getting better. And if you recharge the batteries with electricity which comes from solar and wind power, they are very clean technology.
- By law, the petrol sold in Brazil is 25% ethanol – a fuel made from sugar. It pollutes less than ordinary petrol. However, growing the sugar uses a lot of energy, and some people say the fuel can damage car engines.
- Hydrogen – a natural part of water – is used in some vehicles, including buses in cities around the world. It's a great fuel, because the only waste it produces is water. The big problem is that making hydrogen fuel creates a lot of pollution.

Smoke to make shade?

Smoke from volcanoes and forest fires is known to block the sun and cool the Earth. Scientists at the University of Bristol in the UK have done experiments to test the idea of creating smoke to cool the world. The idea is disliked by most experts as a possibly very dangerous way to fight climate change. Dr Hugh Hunt, director of the research projects, said that the technology won't be developed in the near future.

A vegetarian diet?

According to a report by the United Nations, producing meat creates more greenhouse gas emissions than transport – 18% of the world's total. Eating less meat would help to reduce emissions and possibly fight global warming. Cities in Belgium, Brazil, Germany and South Africa – among many others – have 'no-meat' days to bring the issue to people's attention, and to try to fight climate change close to home.

These are big ideas, but the solution in the end may be a big sum of small actions.

TASK 1 - Read the article. Choose the correct option to complete the sentences.

1. The article is about *ways to deal with / things that cause* climate change.
2. It explains several different types of *environmental problem / technology*.
3. Most of the ideas in the article are *success stories / not fully developed*.

Answers For Directed Reading On Climate:

Visualizing Weather and Climate Bruce Anderson, Alan H. Strahler, 2008-09-22 Visualizing Weather and Climate Change will capture the reader's interest in weather and climate and then use that interest to engage them in activities that demonstrate the science that serves as the basis of the discipline. Sections such as Eye on the Atmosphere use beautiful imagery to help them see the atmosphere through the eyes of a meteorologist and ask scientific questions that place significant features in atmospheric context. It also includes expanded coverage of global change and recent phenomena. Chapter summaries, self-tests, and critical thinking questions help prepare readers for quizzes and tests while the illustrated case studies offer a wide variety of in-depth examinations that address important issues in the field of environmental science.

Berries Level Three A Story Magic Lory G. Harboyan, 2007-02-06 Berries offers learners in elementary classes the opportunity to discover the joy in learning. It provides through fun and motivating activities all the basic skills for language learning. To that end, learners will be effectively engaged in a well-structured comprehensive program as they master listening, speaking, reading, writing, phonics, spelling, and critical thinking skills. Berries components: Learner's, Instructor's, Story Magic Manual, and Answer Key, Grammar Audio CD, Phonics Assessment CD, Practice Theme-based Posters. Each of the learner's four books covers a range of components targeting the specific objectives of the respective language areas. Special care has been given to the choice of themes to guarantee motivation and encourage social interaction. Study skills and cross-curricular links are also integrated in the program, helping learners experience global education early on in their academic lives. Berries makes learning fun. Dowling, 2009-01-01 Dowling is using the term forensics to refer to approaches to research that claim to uncover truths about the world that are somehow independent of the means of their uncovering For some time now such approaches have been widely regarded as naive but it is not clear that the implications of this recognition have always been adequately or appropriately taken into account In attempting to do just that Dowling presents a mature exposition of his organisational language social activity method SAM in dialogue with a wide range of cultural settings texts and technologies SAM has been developed over a period of some twenty years via the transaction between a fundamental theoretical principle and empirical data This principle asserts that the sociocultural is to be understood in terms of strategic autopoietic action directed at the formation maintenance and destabilising of alliances and oppositions and the alliances and oppositions that are themselves emergent upon such action This anti forensic constructive description understands data texts not as products of generative structures that lie behind them but as instances of the organisational language SAM that will ultimately describe them and that is in a sense in front of them Dowling describes himself as a theory engineer The productivity of this work is in its

potential to generate principled and articulated descriptions of empirical settings and texts new ways of looking at them not to direct but to interrogate other practices relating to these settings and texts to ask questions that would otherwise be left unasked The origins of SAM lie in the analysis of mathematics education texts in the late 1980s and early 1990s and one of the chapters in this volume is again concerned with mathematics and science education in the first part of the twenty first century Other settings that come under scrutiny include classrooms film art literature knowledge in various domains the internet and so forth The book also includes fundamental engagement with forensics in particular the work of and work inspired by Basil Bernstein Paul Dowling is Professor of Education at the Institute of Education University of London Before joining the Institute in 1987 he had taught mathematics in secondary schools in and around London His other publications include *The Sociology of Mathematics Education Mathematical Myths Pedagogic Texts* 1998 Falmer Press and *Doing Research Reading Research Re-interrogating education* with Andrew Brown Routledge 1998 and 2009
