**APhA's Complete Review for the Pharmacy Technician** L. Michael Posey, American Pharmaceutical Association, 2001  
This review by the American Pharmacy Association APhA is organized to correspond directly to the National Pharmacy Technician Certification Examination's Content Outline. The Content Outline revised in March 2000 is based on a US national study of tasks pharmacy technicians perform in a variety of practice settings. So APhA's review is both a thorough primer on the many specific activities that pharmacy technicians actually perform and a detailed review of the knowledge that test candidates must master to pass the Pharmacy Technician Certification Examination. **APhA's Complete Math Review for the Pharmacy Technician** William Alexander Hopkins (Jr.), 2001. This work offers an instructional approach to lifelong understanding of pharmaceutical calculations. Featuring real world practice problems, it can be used in the classroom for the national Pharmacy Technician Certification Examination or for the pharmacy practice setting. The book covers every topic related to pharmaceutical calculations that a pharmacy technician needs to know. There are 502 practice problems spread through the book's 12 chapters with answer key and solutions in the back. It concludes with a 101 question post test, each question being a real world problem a technician might encounter in pharmacy practice with an answer key and solutions for these. **APhA Supportive Personnel Training: Pharmacist's manual** American Pharmaceutical Association, 1978
