Through accounts of migrations warriors and figures like Cheddar Man we see enticing and potent narratives that reach far beyond what can be gathered from the scientific study of molecules alone Rather by privileging certain narratives and questions like those about sex or eye and skin color our stories of ancient DNA are spun around the structure of today s methodologies technologies and popular and political interests K l l n considers how DNA is used to sensationalize stories how its use poses questions of ethics and care and who is responsible if stories of ancient DNA are adopted for dangerous political projects
