unchanged since the passage of the General Mining Law of 1872 That legislation was originally intended to promote
settlement and economic development of the American West A century and a quarter later the region no longer requires
congressional coddling yet more than half a million mines and mill sites remain abandoned throughout the western states
These sites have created 180 000 acres of polluted lakes and reservoirs and 12 000 miles of contaminated streams and rivers
Montana s Blackfoot River made famous by Norman Maclean s A River Runs through It is one such battered body of water
Not only did the 1872 law essentially give the land and minerals to miners and mining companies and it continues to do so
today the law also required no mine reclamation or water quality protection State mining laws likewise required little or no
reclamation Wounding the West traces the role of hardrock mining and its relationship with the American West by following
the environmental history of one Montana mine the Mike Horse from its 1898 discovery through its heyday in the 1940s
subsequent abandonment and eventual cleanup under the coercion of a state law that many would consider ill suited for
abandoned mines David Stiller argues that taxpayers should treat mining companies like the for profit enterprises they are
and insist that the hardrock mining industry pay a fair royalty for extracted minerals and then put this funding to work
