emotional intelligence personality empathy compassion and behaviour change Attention is given to the role of positive early life experiences in creating an internal working model of the world that is based on trust intimacy and hope and how the root causes of vulnerability often lie in the cyclical relationship that exists between child maltreatment trauma and socially deprived environments that cumulatively act to keep people locked in states of inter generational poverty The author explores pressing and important workplace issues such as occupational stress and burnout and highlights the urgent need for compassionate systems of management that are functionally equipped to address human error stress and trauma in complex professional arenas where staff are continually exposed to other peoples suffering The book also demonstrates how strategies and processes which coerce individuals and groups into changing their behaviour are generally counterproductive and it explains how resilient change is invariably supported by strategies that enhance trust cooperation personal control and self efficacy This book will benefit professional staff including health emergency and social services humanitarian workers counsellors and therapists as well as students who want to learn more about the conceptual frameworks that explain vulnerability and resilience *Research in Computational Molecular Biology* Martin Vingron,Limsoon Wong,2008-03-14 This book constitutes the refereed proceedings of the 12th Annual International Conference on Research in Computational Molecular Biology RECOMB 2008 It presents current issues in algorithmic theoretical and experimental bioinformatics
