- 1.1 The graphs below show the relationship between the net force and the acceleration for two masses X and Y.

Which one of the following statements is true?

- A X has a greater mass.
 - B The bodies have equal mass.
 - C Y has a greater mass.
 - D The mass would not affect the gradient of the graph.
- 1.2 In which of the following cases would the resultant force acting on an object be equal to 0N.
- A An object moving with constant acceleration.
 - B When the only force acting on the object is gravitational acceleration.
 - C An object that undergoes equal displacements every second.
 - D An object is moving with increasing acceleration.
- 1.3 Which of the statements below best describes Weightlessness?
- A An object moving at constant velocity upwards from the ground.
 - B An object moving at constant velocity downwards from the ground.

2014 Physical Science March Test:

The Role and Risks of Assumptions in Physical Science Modelling Allan Anforth, 2024-10-11 This book questions the extent to which some physical scientists may have unintentionally misused the English language to varying degrees in arriving at theories that are presented to the world as being statements of fact about the universe The book focuses primarily on large and small scale extremes i e cosmological theories and quantum theories It deals with the core concepts of time and space as they are presented in the theories under consideration As a demonstration of the sensitivity of the outcome of physical modelling to the assumptions made the book presents an alternative cosmological model based on some altered physical assumptions that see the much vaunted inconsistency between General Relativity and Quantum Field Theory disappear

Future Of High Energy Physics, The - Some Aspects Luis Roberto Flores Castillo, Kirill Prokofiev, 2017-02-20 The monumental discovery of the Higgs boson at the LHC marked the beginning of a new era in the high energy physics Although the particle spectrum of the Standard Model is now complete with the Higgs boson the hierarchy problem and the lack of explanation of the origin of dark matter imply that a new Beyond the Standard Model physics should exist There is however no clear indication experimental or otherwise of the energy scale at which this new physics should appear Current results from the LHC experiments have shown no unpredicted effects up to pp collision energies of 13 TeV If not observed directly at the LHC the new physics may reveal itself through deviations of Higgs properties from their Standard Model expectations or it may become directly accessible only at new higher energy accelerator facilities It is then of primary importance to have a comprehensive review of the available and planned accelerators and their design physics motivation and expected performance This book comprises 26 carefully edited articles with well referenced and up to date material written by many of the leading experts These articles originated from presentations and dialogues at the second HKUST Institute for Advanced Study Program on High Energy Physics are organized into three aspects Theory Accelerator and Experiment focusing on in depth analyses and technical aspects that are essential for the developments and expectations for the future high energy physics
