

How to Answer Extended-Response or Essay Questions

Extended-response or essay questions take care and thought, but they are nothing to fear. In fact, the more you show what you know about a topic, the more credit you are likely to receive on a test.

How To Do It

Good extended-response answers have three parts: a beginning, a middle, and an ending.

Beginning

The first paragraph introduces your main idea or position. It begins with a topic sentence. The topic sentence states plainly the point you intend to make in your answer. Often it simply restates the question.

Middle

The second paragraph provides information, examples, and details to support your main idea or position. This is where you show in detail what you know or think about the topic. If the answer calls for a great deal of information, you may need more than one paragraph.

Ending

The final paragraph sums up your main idea or position. It restates your topic sentence, this time with more feeling.

Now You Try

Work through these steps as you answer the question below. Write your answer on a separate piece of paper.

Step 1 Read the question carefully. Take a moment to think about it. What exactly is it asking? Are you being asked to argue a position or to show what you know about a subject? Be sure you know what you are being asked to do before you begin writing.

Question:

Many cities around the world are located near large rivers and lakes, or near an ocean. Why do you think this is so? Provide three or more important advantages that waterways offer cities, and explain why each advantage is important. Give examples.

Ebook: How to Get a Master's Degree: Everything You Need to Know About Taught Postgraduate Study E. Anna Claydon, Colin Johnson, 2025-06-18 This book is explicitly designed to echo the structure of the highly successful book *How to Get a PhD* the 2022 edition of which has been co-authored by Colin Johnson As such the book functions primarily as a holistic guide for students to all stages of their study at master's level which is the biggest growth area in UK higher education The book seeks to address students who are studying in many different academic contexts and will engage with differences in disciplines national contexts and experience throughout Like *How to Get a PhD* this book is designed both to be a book that students can read in order to understand the entirety of the master's process as well as a well-organised companion that students can refer to for advice relevant to different stages of their studies The book will also contain advice for supervisors of master's dissertations and staff who are in charge of running master's degree programmes and advice for universities more broadly about strategic issues around master's degrees This rationale behind this connects to the fact that many academics use *How to Get a PhD* to help inform their work with their students and employ the materials in HE professional teaching qualifications where books such as this also are also often on reading lists Consequently the section aimed at institutional advice will reach audiences in HE staff development who have educational strategy reach as well as colleagues who are mentoring newer academics *How to Get a Masters Degree* will explain the whole process from application to graduation including how to make a good application again emphasising what is distinctive about master's degree applications This along with materials about the post-master's options will make it the only book currently in the market that covers the whole process and will function as a one-stop shop for readers despite the plethora of books which engage with Master's dissertations theses Anna Claydon is Associate Professor in Media and Communication at the University of Leicester UK She is Director of Equalities for the School of Media Communication and Sociology She previously led the University review on the postgraduate portfolio Colin Johnson is Associate Professor in Computer Science at the University of Nottingham UK and was formerly Associate Dean for Graduate Studies in the sciences at the University of Kent He is an experienced PhD supervisor and examiner and has led training courses for new PhD students and advised on postgraduate strategy for a number of universities

Theatre in the Classroom, Grades 6-12 Jim Patterson, 2016-07-14

This latest edition *Theatre in the Classroom Grades 6-12* equips prospective theatre teachers with key instructional methods and proven strategies for student learning. Building on the previous edition's strengths, Patterson extensively modified and updated the entire text incorporating the most recent theatre standards by the National Coalition for Core Arts Standards. This indispensable guide whose theoretical and philosophical underpinnings and practical classroom applications endow it with a lifetime of use includes ideas for resource portfolios, checklists, rubrics, and other assessment tools. Of additional value are discussions concerning managing the classroom, linking school play production with classroom learning, and recognizing and responding to classroom diversity. Patterson details important considerations and resources for planning productions ranging from those available from professional organizations to those found within the community to those generated by students. He believes theatre learning must go beyond the study and performance of established play scripts and stresses the importance of productions written, directed, designed, and managed by students. End of chapter sections include Extension Activities, ways to help prospective teachers further explore the subject in the college level methods course, Stay Connected websites for additional resource and research materials, and Professional Development suggestions for expanding personal and career development.
