Education and Teacher Education in the Modern World P. Calogiannakis, K.G. Karras, C.C. Wolhuter, 2015-11-25 This book discusses current problems and policies approaches trends and recruitment conditions within the education of teachers in the modern world It investigates new research within this area and explores various aspects prevalent in teachers and in their own and general education today The contributions to this volume approach the topic of modern teachers from various geographical and contextual perspectives discussing the challenges facing teachers from educational cultural socio political demographic and economic points of view *Language Teaching Research and Language Pedagogy* Rod Ellis, 2012-03-27 This book examines current research centered on the second language classroom and the implications of this research for both the teaching and learning of foreign languages It offers illuminating insights into the important relationship between research and teaching and the inherent complexities of the teaching and learning of foreign languages in classroom settings Offers an accessible overview of a range of research on instruction and learning in the L2 classroom Bridges the relationship between research teachers and learners Helps evolve the practice of dedicated current language teachers with research findings that suggest best practices for language teaching **Neuroscience-based Cognitive Therapy** Tullio Scrimali, 2012-04-23 A pioneer of CBT explores recent advances in neuroscience showing how they can be applied in practice to improve the effectiveness of cognitive therapy for clients with a wide range of diagnoses including mood disorders anxiety disorders eating disorders and schizophrenia Utilizes the latest advances in neuroscience to introduce tools that allow clinicians for the first time to directly measure the effectiveness of cognitive therapy interventions Rigorously based in neuroscientific research yet designed to be readable and jargon free for a professional market of CBT practitioners Covers theory assessment and the treatment of a wide range of specific disorders including anxiety disorders mood disorders eating disorders addictions and schizophrenia Written by a respected pioneer in the field Discursive Psychology Cristian Tileagă, Elizabeth Stokoe, 2015-08-27 Discursive Psychology is the first collection to systematically and critically appraise the influence and development of its foundational studies exploring central concepts in social psychology such as attitudes gender cognition memory prejudice and ideology The book explores how discursive psychology has accommodated and responded to assumptions contained in classic studies discussing what can still be gained from a dialogue with these inquiries and which epistemological and methodological debates are still running or are worth reviving International contributors look back at the original ideas in the classic papers and consider the impact on and trajectory of subsequent work Each chapter locates a foundational paper in its academic context identifying the concerns that motivated the author and the particular perspective that informed their thinking The contributors go on to identify the main empirical theoretical or methodological contribution of the paper and its impact on consequent work in discursive psychology including the contributors own work Each chapter concludes with a critical consideration of how discursive psychology can continue to

develop This book is a timely contribution to the advance of discursive psychology by fostering critical perspectives upon its intellectual and empirical agenda It will appeal to those working in the area of discursive psychology discourse analysis and social interaction including researchers social psychologists and students **A Drive to Survive** Kathryn Nave,2025-02-04 How the purposive behavior of living systems outstrips the constraints of the free energy principle Since 2005 Karl Friston's proposal that the principle of free energy minimization underpins the purposive behavior of living agents has evolved through thousands of publications This principle's central move is to formalize the drive for self preservation in terms of a single probabilistic imperative to survive a living system must consistently exhibit the same most likely pattern of activity over time Despite the simplicity of this central claim the free energy principle's complexity and rate of development have previously made it difficult to identify and evaluate In **A Drive to Survive** Kathryn Nave offers an extended critical analysis of the strengths and limitations of Friston's proposal Nave shows that the free energy principle's capacity to account for the biological origins of purposiveness is undermined by its applicability to any stable inanimate system As this triviality has become apparent so advocates have begun to reframe the free energy principle as a means to eliminate rather than explain the notion of distinctively biological purposiveness This Nave proposes gets things the wrong way around The triviality of free energy minimization does not prove that there is no difference in kind between living agents and ordinary machines but rather it reflects that the framework cannot capture the intrinsic instability and unpredictability that distinguish the former
