

## Chapter 42 – Circulation

Gas exchange overview:

Ventilation --> Diffusion of respiratory surface --> Circulation --> Diffusion of tissues --> Cellular respiration

### To maximize gas exchange

1. Large surface area
2. Thin respiratory surface
3. Large pressure gradient

Gas exchange organs

- Gills – countercurrent exchange, opposite directions
  - Insect trachea
  - Lungs – Alveoli, tremendous surface area and loaded with capillaries
- 
- ❖ Breathing is regulated by CO<sub>2</sub> levels
  - Left side of the heart has the thicker ventricle which is the side that focuses on the rest of the body while the right side of the heart has a thinner ventricle which only pumps blood to the heart

### **2 circuits**

1. Pulmonary – to the lungs, away from the heart
  - Pulmonary artery – deoxygenated, carries blood to the lungs
  - Pulmonary vein – oxygenated, carries blood from lungs to the heart
2. Systemic – to the rest of the body, oxygenated

### Capillary Exchange (How plasma exits and enters the capillaries)

1. Blood pressure
2. Osmotic pressure

How does the heart work?

- Myogenic – The heart generates its own electrical impulse
- Gap Junctions – keeps the whole heart beating as a coordinated unit due to the ions being released

Blood components

- Hemoglobin – carries oxygen and releases oxygen in our muscles, brain, etc.
- ❖ CO<sub>2</sub> is transported in blood by Bicarbonate ions

Markovits, Jacques Pouchepadass, Sanjay Subrahmanyam, 2006 The idea of an eternal India based on stable and unchanging villages has been in disarray for at least two decades However having demolished this myth historians have been rather less able to construct an alternative vision This volume sets out to do just that using the idea of circulation in relation to South Asia in the colonial period It comprises a set of complementary essays which deal with merchant circulation pilgrimages cartography policing labor mobility and the movement of itinerant groups from colonial administrators to wandering bards demonstrating that the South Asia of this period was made and remade by changing patterns and the logic of circulation Once this perspective is integrated into the analysis of society new and disturbing questions emerge on issues such as culture identity and ethnogenesis which are normally treated in the context of fixed and stable societies The essays in this volume written by some of the leading authorities in South Asian history break new ground in suggesting the outlines of a different framework for historical analysis This volume will interest not only South Asianists but also those interested in historical method as well as wider comparative perspectives on early modern and contemporary history *House Documents,*
