

Analyze

1. See Data Table.
2. See Data Table.
3. See Data Table. Sample Calculation for Pluto: $e = 4/16 = 0.25$
4. See Data Table.
5. Both foci are at the center.
6. It is very close to being a circle.
7. The comet. It looks more flattened out than the other orbits.

Conclude and Apply

1. Yes, the planets and comet travel in elliptical orbits.
2. Since the eccentricity of Earth is so small, Kepler might not have concluded that planets have elliptical orbits.
3. It travels fastest at perihelion. According to Kepler's second law, equal areas are swept out in equal time. Since there is less area available at perihelion, the planet must move faster.
4. $\frac{v_P}{v_A} = \frac{A}{P} = \frac{10.0}{6.0} = \frac{1.7}{1}$
5. $v_A = \text{minimum velocity}$
 $= 3.7 \text{ km/s}$
 $v_P = 1.7 \times v_A$
 $= 1.7 \times 3.7 \text{ km/s}$
 $= 6.3 \text{ km/s}$

Going Further

1. Collect data using dates of location of a planet. Use areas and dates to confirm the second law.
2. In order to show the third law, a computer model would have a planet actually moving so that periods and distances could be measured.

Real-World Physics

Students can research elliptical orbits of satellites. Encourage the students to pick one or two satellites and, if possible, plot orbit data to determine the path that each satellite takes.

Critical Analysis of Science Textbooks Myint Swe Khine,2013-06-26 The critical analysis of science textbooks is vital in improving teaching and learning at all levels in the subject and this volume sets out a range of academic perspectives on how that analysis should be done Each chapter focuses on an aspect of science textbook appraisal with coverage of everything from theoretical and philosophical underpinnings methodological issues and conceptual frameworks for critical analysis to practical techniques for evaluation Contributions from many of the most distinguished scholars in the field give this collection its sure footed contemporary relevance reflecting the international standards of UNESCO as well as leading research organizations such as the American Association for the Advancement of Science whose Project 2061 is an influential waypoint in developing protocols for textbook analysis Thus the book shows how to gauge aspects of textbooks such as their treatment of controversial issues graphical depictions scientific historiography vocabulary usage accuracy and readability The content also covers broader social themes such as the portrayal of women and minorities Despite newer more active pedagogies textbooks continue to have a strong presence in classrooms and to embody students socio historical inheritance in science Despite their ubiquitous presence they have received relatively little on going empirical study It is imperative that we understand how textbooks influence science learning This book presents a welcome and much needed analysis Tina A Grotzer Harvard University Cambridge Massachusetts USA The present book provides a much needed survey of the current state of research into science textbooks and offers a widerange of perspectives to inform the science of writing better science textbooks Keith S Taber University of Cambridge Cambridge United Kingdom

Web-Based Engineering Education: Critical Design and Effective Tools Russell, Donna,Haghi, A.K.,2010-06-30 Rapid advances in computer technology and the internet have created new opportunities for delivering instruction and revolutionizing the learning environment This development has been accelerated by the significant reduction in cost of the Internet infrastructure and the easy accessibility of the World Wide Web This book evaluates the usefulness of advanced learning systems in delivering instructions in a virtual academic environment for different engineering sectors It aims at providing a deep probe into the

most relevant issues in engineering education and digital learning and offers a survey of how digital engineering education has developed where it stands now how research in this area has progressed and what the prospects are for the future

Phy. Lab and Pocket Lab Wk/Sheets Phy:P&P Zitzewitz,1998-07 Gaming and Simulations: Concepts, Methodologies, Tools and Applications Management Association, Information Resources,2010-11-30 This book set unites fundamental research on the history current directions and implications of gaming at individual and organizational levels exploring all facets of game design and application and describing how this emerging discipline informs and is informed by society and culture Provided by publisher **A History of Ideas in Science Education** George DeBoer,2019-07-05 By allowing key scientists researchers professors and classroom teachers of science to speak for themselves through their published writings about what is best and needed for the field Dr DeBoer presents a fascinating account of the history of science education in the United States from the middle of the 19th century to the present The book relates how science first struggled to find a place in the school curriculum and recounts the many debates over the years about what that curriculum should be In fact many of what we consider modern ideas in science education are not new at all but can be traced to writings on education of one hundred years ago The book is aimed at all those interested in science education classroom teachers and science education leaders concerned about the historical justification of the goals and strategies proposed for the field The book should be enjoyed not only by the researcher but also by anyone curious about just how curriculum is decided upon and implemented on a national scale This is without question the finest book of its kind on the market It deserves to be widely read by current and future science teachers supervisors science education faculty in colleges and universities curriculum developers and program officers in funding agencies The Science Teacher Adds a significant dimension to the history of American schooling and curriculum History of Education Quarterly **Study Guide to Accompany Physics : Principles and Insights** Ira Maximilian Freeman,1968 **Learning to Solve Problems** David H. Jonassen,2010-09-13 This book provides a comprehensive up to date look at problem solving research and practice over the last fifteen years The first chapter describes differences in types of problems individual differences among problem solvers as well as the domain and context within which a problem is being solved Part one describes six kinds of problems and the methods required to solve them Part two goes beyond traditional discussions of case design and introduces six different purposes or functions of cases the building blocks of problem solving learning environments It also describes methods for constructing cases to support problem solving Part three introduces a number of cognitive skills required for studying cases and solving problems Finally Part four describes several methods for assessing problem solving Key features includes Teaching Focus The book is not merely a review of research It also provides specific research based advice on how to design problem solving learning environments Illustrative Cases A rich array of cases illustrates how to build problem solving learning environments Part two introduces six different functions of cases and also describes the parameters of a case

Chapter Integration Key theories and concepts are addressed across chapters and links to other chapters are made explicit The idea is to show how different kinds of problems cases skills and assessments are integrated Author expertise A prolific researcher and writer the author has been researching and publishing books and articles on learning to solve problems for the past fifteen years This book is appropriate for advanced courses in instructional design and technology science education applied cognitive psychology thinking and reasoning and educational psychology Instructional designers especially those involved in designing problem based learning as well as curriculum designers who seek new ways of structuring curriculum will find it an invaluable reference tool

Chatgpt and Other Generative AI Tools Jochen Kuhn, Stefan Küchemann, Knut Neumann, Martina Rau, 2025-02-17 In the past ten years applications of generative artificial intelligence GAI have found rapidly growing use in medicine science and daily life Large language models LLMs opened up new avenues in particular for education LLMs have been used to create interactive educational content for students stimulate their curiosity generate code explanations and develop assessment questions Additionally LLMs been applied for language practice anxiety alleviation and feedback provision In higher education LLMs have shown potential for assisting in medical exam preparation and clinical decision making In school education LLMs can help teachers with automated evaluation of student responses and respective adaptive feedback More recently LLM based applications such as chatGPT have been used to generate teaching materials or assessment tasks across different subjects The fields understanding of the effects of the use of LLM based applications in classroom teaching however is still in its infancy GAI tools may help solving a range of tasks in education in particular with respect to teachers and students and teachers efforts to generate content However it is critical that teachers and students do not overly rely on GAI generated solutions but instead critically assess each solution Students should furthermore not use GAI tools to avoid investing relevant mental effort to create mental models or more broadly build up competencies

Locke,Sharon Smaldino,Mary Herring,2013-04-12 Learning Problem Solving and Mindtools is inspired by the substantial body of learning research by David H Jonassen in the areas of mind tools and problem solving The focus of the volume is on educational technology especially with regard to how new technologies have facilitated and supported problem solving and critical thinking Each chapter focuses on a particular aspect of learning with technology and elaborates the implications for

the design and implementation of learning environments and activities aimed at improving the conceptualization of problems reasoning and higher order thinking and solving challenging problems This collection of scholarly essays provides a highly engaging treatment of using tools and technologies to improve problem solving multiple perspectives on integrating educational technology to support learning in complex and challenging problem solving domains guidance for the design of instruction to support problem solving a systemic account of the relationships between mental models instructional models and assessment models and a look into the future of educational technology research and practice **Design**

Recommendations for Intelligent Tutoring Systems Dr. Robert A. Sottolare, US Army Research Laboratory, Dr. Arthur Graesser, University of Memphis, Dr. Xiangen Hu, University of Memphis, Dr. Benjamin Goldberg, US Army Research Laboratory, 2014-07-01 Design Recommendations for Intelligent Tutoring Systems explores the impact of intelligent tutoring system design on education and training Specifically this volume examines Instructional Management techniques strategies and tactics and identifies best practices emerging concepts and future needs to promote efficient and effective adaptive tutoring solutions Design recommendations include current projected and emerging capabilities within the Generalized Intelligent Framework for Tutoring GIFT an open source modular service oriented architecture developed to promote simplified authoring reuse standardization automated instructional management and analysis of tutoring technologies

Active Learning: Theoretical Perspectives, Empirical Studies and Design Profiles Robert Cassidy, Elizabeth S. Charles, James D. Slotta, Nathaniel Lasry, 2019-07-11 This book represents the emerging efforts of a growing international network of researchers and practitioners to promote the development and uptake of evidence based pedagogies in higher education at something a level approaching large scale impact By offering a communication venue that attracts and enhances much needed partnerships among practitioners and researchers in pedagogical innovation we aim to change the conversation and focus on how we work and learn together i e extending the implementation and knowledge of co design methods In this first edition of our Research Topic on Active Learning we highlight two of the three types of publications we wish to promote First are studies aimed at understanding the pedagogical designs developed by practitioners in their own practices by bringing to bear the theoretical lenses developed and tested in the education research community These types of studies constitute the practice pull that we see as a necessary counterbalance to knowledge push in a more productive pedagogical innovation ecosystem based on research practitioner partnerships Second are studies empirically examining the implementations of evidence based designs in naturalistic settings and under naturalistic conditions Interestingly the teams conducting these studies are already exemplars of partnerships between researchers and practitioners who are uniquely positioned as in between straddling the two worlds As a result these publications represent both the rigours of research and the pragmatism of reflective practice In forthcoming editions we will add to this collection a third type of publication design profiles These will present practitioner developed pedagogical designs at varying levels of abstraction to be held to scrutiny

amongst practitioners instructional designers and researchers alike We hope by bringing these types of studies together in an open access format that we may contribute to the development of new forms of practitioner researcher interactions that promote co design in pedagogical innovation

The Nature of Expertise Michelene T.H. Chi,Robert Glaser,Marshall J. Farr,2014-01-02 Due largely to developments made in artificial intelligence and cognitive psychology during the past two decades expertise has become an important subject for scholarly investigations The Nature of Expertise displays the variety of domains and human activities to which the study of expertise has been applied and reflects growing attention on learning and the acquisition of expertise Applying approaches influenced by such disciplines as cognitive psychology artificial intelligence and cognitive science the contributors discuss those conditions that enhance and those that limit the development of high levels of cognitive skill
