MorphoEvoDevo: A Multilevel Approach to Elucidate the Evolution of Metazoan Organ Systems, 2023-11-10 Analyzing animal development in a comparative framework provides a unique window into evolutionary history With a long tradition that dates back to iconic 19th century zoologists such as Ernst Haeckel and Charles Darwin Evolutionary Developmental Biology is firmly rooted in morphological research While studies using a classical model system approach have resulted in considerable methodological progress in particular by establishing molecular genetic tools to tackle questions surrounding animal development it quickly became obvious that a broad comparative dataset involving as many taxa as possible is necessary for sound evolutionary inferences Thus today's EvoDevo embraces morphological molecular and experimental procedures interpreted in a phylogenetic framework in order to answer key questions that revolve around the evolution of animal cell types organ systems and ultimately entire species
