*Crime and Terrorism* Seymour E. Goodman,Abraham D. Sofaer,2013-11-01 In December 1999 more than forty members of government industry and academia assembled at the Hoover Institution to discuss this problem and explore possible countermeasures The Transnational Dimension of Cyber Crime and Terrorism summarizes the conference papers and exchanges addressing pertinent issues in chapters that include a review of the legal initiatives undertaken around the world to combat cyber crime an exploration of the threat to civil aviation analysis of the constitutional legal economic and ethical constraints on use of technology to control cyber crime a discussion of the ways we can achieve security objectives through international cooperation and more Much has been said about the threat posed by worldwide cyber crime but little has been

done to protect against it. A transnational response sufficient to meet this challenge is an immediate and compelling necessity and this book is a critical first step in that direction. *Mapping Transatlantic Security Relations* Mark B. Salter, 2010-04-15

This book examines how legal, political, and rights discourses, security policies and practices migrate and translate across the North Atlantic. The complex relationship between liberty and security has been fundamentally recast and contested in liberal democracies since the start of the global war on terror. In addition to recognizing new agencies, political pressures, and new sensitivities to difference, it is important not to overstate the novelty of the post 9/11 era; the war on terror simply made possible the intensification, expansion, or strengthening of policies already in existence or simply enabled the shutting down of debate. Working from a common theoretical frame, if different disciplines, these chapters present policy-oriented analyses of the actual practices of security, policing, and law in the European Union and Canada. They focus on questions of risk and exception, state sovereignty and governance, liberty and rights, law and transparency, policing and security. In particular, the essays are concerned with charting how policies, practices, and ideas migrate between Canada, the EU, and its member states. By taking a field approach to the study of security practices, the volume is not constrained by national case study or the solipsistic debates within subfields and bridges legal, political, and sociological analysis. It will be of much interest to students of critical security studies, sociology, law, global governance, and IR in general. Mark B. Salter is Associate Professor at the School of Political Studies, University of Ottawa.
