Key Topics in Critical Care, Second Edition T. M. Craft, M. J. A. Parr, Jerry P. Nolan, 2004-11-10
High quality critical care medicine is a crucial component of advanced health care. Completely revised and updated. Key Topics in Critical Care Second Edition provides a broad knowledge base in the major areas of critical care enabling readers to rapidly acquire an understanding of the principles and practice of this area of modern clinical medicine. Expanded to include the latest hot topics the new edition puts an increased emphasis on recent reviews and contains added references to key landmark papers. Using the trademark Key Topics style each topic has been written by an expert in the field and includes a succinct overview of the subject with references to current publications for further reading. The book provides a framework for candidates of postgraduate medical examinations such as FRCS MRCP and FRCA and a reference that can be consulted in emergency situations. New topics include Critical illness polyneuromyopathy, End of life care, Inotropes and vasopressors, Medical emergency team outreach, critical care Status epilepticus, Venous thromboembolism.

Pediatric Transfusion Medicine Duke Kasprisin, Naomi Luban, 1987-07-31
This two volume set is an in depth examination of the unique complexities that exist in transfusing pediatric patients. It thoroughly examines transfusion therapy in neonates, genetic hematologic disorders and pediatric oncology and it reviews risks and administration techniques unique to pediatrics.

Transfusion Medicine and Blood Michel Prudent, Jean-Daniel Tissot, Stefano Fontana, Christoph Niederhauser, 2019-04-04
Research in transfusion medicine is diverse and interdisciplinary involving scientists and physicians in hematology, basic sciences, biology, biotechnology and so forth. It regularly proposes innovation from the donors to the patients along the whole transfusion chain in terms of blood screening, processing and transfusion practice. The present Research Topic covers recent advances in transfusion medicine and blood and provides an overview of the current knowledge. It includes original articles, reviews and perspectives for the future challenges.

Microbiology Australia, 2005-03 **Microbiology Australia**, 2005-03 **History of Blood Donation and Transfusion Medicine** Zdravko Kvržić, 2024-11-25
This book offers a global overview of the history of blood donation using evidence based research to provide accurate information on the beginnings of blood donation and transfusion medicine developed as the result of numerous trials and successes throughout history. It leads the reader step by step through time to

discover how people perceived blood and how they managed to develop new ways of treating various unfortunate conditions that shattered a person's healthy life. This book also presents new technical discoveries that have advanced through the present day and explains how in cases of deadly diseases safety procedures for blood examination have been made mandatory. The conditions that led to the contamination of thousands of patients by HIV and hepatitis C around the world are explained and the debate between voluntary and paid systems is covered as well. This book is a unique resource beneficial for everyday practice as it encourages the reader to develop advanced practices for better and safer work with blood donors and in transfusion medicine. It gives a sense of humanitarian devotion to the deed of giving a part of yourself to save others' lives in danger because of trauma, disease, etc. and it shares different stories of blood donors to help patients get over their fear of donating blood. It is useful for nurses, doctors, students, blood donors, historians, and other experts.

Blood Works: An Owner's Guide Shannon L. Farmer, Irwin Gross, Aryeh Shander, 2022-11-29

Much has been published on heart health, kidney health, and gut health. But how many of us are aware of our blood health? Is your blood as healthy as it should be? How would you even know? *Blood Works* is a fascinating new blood owner's guide to help you care for the health of your most precious fluid: your blood. About 2 billion people globally are anemic, and almost as many suffer from iron deficiency without anemia. Many don't even know they have it, just feeling tired, lethargic, and foggy-headed. Sound familiar? Over 600 million more suffer from acute or sometimes unrecognized chronic blood loss from causes such as heavy menstrual bleeding, obstetric hemorrhage, gastrointestinal bleeding, surgery, and trauma. Anemia, iron deficiency, and bleeding are signs of blood failure and have major negative health effects. *Blood Works*, with contributions from 48 leading international medical experts, is a must-have book for all who want to look after their blood health. Your blood is the essential fluid that keeps you alive. Yet while many of us know our cholesterol level and blood pressure, few of us are aware of our blood count. What we don't know can affect our everyday quality of life and put us at risk if we have bleeding, an injury, or require hospitalization. Blood and the vessels that contain it make up the largest organ system in the body. Its balance and health must be maintained. For many decades, the treatment of first resort for anemia and blood loss has been blood transfusion, which is essentially a liquid organ transplant from another person. In heart failure or kidney failure, organ transplantation is not first-line treatment. In blood failure, blood transplantation should not be the first thing we reach for. Since the 1990s, scientific research has shown that the common use of blood transfusion is not the most effective treatment in many medical situations. It has been identified as one of the most overused treatments in modern medicine, costing billions of dollars while causing changes in the recipient's immune system that may increase the risk of complications and death. In October 2021, the World Health Organization called for the urgent global implementation of Patient Blood Management (PBM), stating that our own blood is still the best thing to have in our veins. *Blood Works* is one of the most exciting books on blood health you will read. The book zooms in on why medical experts from around the world now recognize the need for fundamental change in the way a patient's blood is managed.

Known as PBM Patient Blood Management places the person receiving treatment at the center of decisions involving their lifeblood Its aim is to improve general health and treatment outcomes by managing and preserving a patient s own blood while empowering them to share in making decisions Meticulously researched and referenced masterfully illustrated and featuring personal stories from patients and their families Blood Works is a compelling read It will have a profound impact on your health and the health of your loved ones and is an invaluable resource for health care professionals Emergency Medicine MCQs - E-Book Waruna De Alwis,Yolande Weiner,2012-09-20 An invaluable self assessment tool for emergency medicine trainees in Australasia Emergency Medicine MCQs is an essential resource for Australasia s emergency medicine trainees A practical self assessment tool the book assists trainees as they expand and refine their knowledge of emergency medicine and will ultimately help them pass the Australasian Emergency Medicine Fellowship examination FACEM The multiple choice questions in Emergency Medicine MCQs cover both the core and non core areas in the Australasian Emergency Medicine Fellowship Using this text trainees can revise alone or with their peers to identify the areas in which they need further development The curriculum is divided into three main areas where trainees require expert level of knowledge high level of knowledge and general level of knowledge It covers important clinical problems encountered in everyday emergency medicine practice from cardiovascular emergencies through to obstetric and gynaecology emergencies disaster management and toxicology As well as being ideal for emergency medicine trainees qualifying through AECM the book is a useful resource for GPs taking the GEM qualification through ACEM and JMOs on call Plus this emergency medicine text is accompanied by an app a separate product containing 180 randomised multiple choice questions on all the topics within the book Test bank Evidence based clinically oriented material Question format coherent with updated ACEM guidelines updated in August 2011 References and further reading *Handbook of Transfusion Medicine* Robert G.
