Archery Anatomy An Introduction To Techniques For Improved Performance Paperback:

Archery Anatomy Ray Axford, 2017-08-01 Archery Anatomy looks at archery techniques from the point of view of the interrelationship between the anatomy of the human body and the anatomy of the bow. Written by an archery expert, it highlights the primary power sources involved in the performance of the sport and enables coaches and archers alike to understand and perfect their skills in ways that use the natural movements of archer and bow in coordination. The book is not tied to any specific national or international rules; it can be used by archers throughout the world to gain an understanding of the biomechanics of the sport. Originating from the author's awareness that the basic problems of most archers stemmed from their ignorance of these aspects, it should make an invaluable contribution to the overall improvement of performance standards. Archery Anatomy combines clear, accurate drawings and diagrams with explanatory text to provide an essential primer on the subject. In *Oboe Secrets*, 75 Performance Strategies for the Advanced Oboist and English Horn Player, Jacqueline Leclair tackles the oboe's reputation as an especially difficult instrument and illustrates how oboists and English horn players can overcome common challenges. Leclair draws on her experience as a performer and instructor, offering practical tips and sometimes revolutionary ideas for rethinking oboe pedagogy. Leclair also looks at performance strategies in the areas of equipment maintenance and management, physical health, and performance technique. Her secrets focus on such matters as how to optimize practice sessions, build endurance, improve use of the body when playing, work with reeds, and apply extended techniques. *Oboe Secrets* provides oboists and English horn players a quick and efficient path to significant improvement, both technically and musically, in their playing. It is the perfect resource for advanced high school oboists, professional performers, music instructors, and avid amateur musicians.
