of other professions Architecture's Afterlife is the first book to examine the sectors into which these graduates migrate and to identify the transferable skills that are learned but not always taught in their degree programmes and that prove most useful in their new careers The book a result of a three year pan European study funded by Erasmus provides a roadmap for increasing graduate employment addressing skills shortages across all sectors and adapting curricula to changing professional landscapes It is therefore essential reading for all those responsible for curriculum design and delivery in architecture and other disciplines including deans professors postgraduate researchers and policy makers as well as students and professionals seeking to expand their career prospects Process: Architecture, 1977 *Philip II of Spain and the Architecture of Empire* Laura Fernández-González, 2021-05-08 Philip II of Spain was a major patron of the arts best known for his magnificent palace and royal mausoleum at the Monastery of San Lorenzo of El Escorial However neither the king's monastery nor his collections fully convey the rich artistic landscape of early modern Iberia In this book Laura Fernández González examines Philip's architectural and artistic projects placing them within the wider context of Europe and the transoceanic Iberian dominions Philip II of Spain and the Architecture of Empire investigates ideas of empire and globalization in the art and architecture of the Iberian world during the sixteenth century a time when the Spanish Empire was one of the largest in the world Fernández González illuminates Philip's use of building regulations to construct an imperial city in Madrid and highlights the importance of his transformation of the Simancas fortress into an archive She analyzes the refashioning of his imperial image upon his ascension to the Portuguese throne and uses the Hall of Battles in El Escorial as a lens through which to understand visual culture history writing and Philip's kingly image as it was reflected in the funeral commemorations mourning his death across the Iberian world Positioning Philip's art and architectural programs within the wider cultural context of politics legislation religion and theoretical trends Fernández González shows how design and images traveled across the Iberian world and provides a nuanced assessment of Philip's role in influencing them Original and important this panoramic work will have a lasting impact on Philip II's artistic legacy Art historians and scholars of Iberia and sixteenth century history will especially value Fernández González's research The Spanish Colonial Revival (Spanish Baroque) in American Architecture Robert Bartlett Harmon, 1983 **American Architect and Building News**, 1893 Pueblo Style and Regional Architecture (Routledge Revivals) Nicholas C.
