Architecture Model Time Lapse:

Architecture's Model Environments Lisa Moffitt, 2023-02-20 Seen through the distilling lens of the architectural model Architecture's Model Environments is a novel and far reaching exploration of the many dialogues buildings have with their environmental surroundings Expanding on histories of building technology the book sheds new light on how physical models conventionally understood as engineering experimentation devices enable architectural design speculation The book begins with a catalogue of ten original model prototypes of wind tunnels water tables and filling boxes and is the first of its kind to establish an architectural approach to fabricating such environmental models Subsequent chapters feature three precedent models that have been largely overlooked within the wider oeuvres of their authors French polymath tienne Jules Marey's 1900 2 wind tunnels Hungarian American architects Victor and Alad r Olgyay's 1955 63 thermoheliodon and Scottish chemist and building ventilation expert David Boswell The Ventilator Reid's 1844 test tube convection experiments Moving between historic moments and the present day between case studies and original prototypes the book reveals the potent ability for models as both physical artefacts and mental ideals to reflect prevailing cultural views about the world and to even reshape those views Fundamentally Architecture's Model Environments illustrates how environmental models reveal design insights across scales from the seam that leaks to the body that feels to the building that mediates to the world that immerses

Envisioning Architecture Eugenio Morello, Barbara E. A. Piga, 2013 *The Routledge Companion to Architectural Drawings and Models* Federica

Goffi, 2022-05-30 Architectural drawings and models are instruments of imagination communication and historical continuity The role of drawings and models and their ownership placement and authorship in a ubiquitous digital age deserve careful consideration Expanding on the well established discussion of the translation from drawings to buildings this book fills a lacuna in current scholarship questioning the significance of the lives of drawings and models after construction Including emerging well known and world renowned scholars in the fields of architectural history and theory and curatorial practices

the thirty five contributions define recent research in four key areas drawing sites sites of knowledge construction drawing office construction site the afterlife of drawings and models archiving collecting displaying and exhibiting tools of making architectural representations and their apparatus over time and the ethical responsibilities of collecting and archiving authorship ownership copyrights and rights to copy The research covers a wide range of geographies and delves into the practices of such architects as Sir John Soane Superstudio Eug ne Emmanuel Viollet le Duc Frank Lloyd Wright Wajiro Kon Germ n Samper Gnecco A PS Mies van der Rohe and Renzo Piano

Rhizosphere Functioning and Structural Development as Complex Interplay between Plants, Microorganisms and Soil Minerals Carsten W. Mueller,Andrea Carminati,Christina Kaiser,Jens-Arne Subke,Caroline Gutjahr,2019-12-19 The rhizosphere the soil volume which is directly affected by root activity is an important hot spot for a multitude of biotic and abiotic processes Carbon transfer from plants to microorganisms and to soil takes place in these small volumes around living roots creating chemical gradients and zones of microbial activity over distinct temporal and spatial scales Hydraulic and biogeochemical properties of the rhizosphere and the formation of complex three dimensional structures such as micro and macroaggregates in turn result from complex feedbacks between physical chemical and biological processes The aim of this Research Topic is to advance our understanding of rhizosphere interactions by collating 16 original contributions across disciplines including original research reviews and specific methods on the processes taking place in the rhizosphere to shed new light on one of the most important interfaces for the diversity of life on earth

Architects Draw Sue Ferguson Gussow,2013-07-02 *Architects Draw* offers a practical and invaluable way to help students and would be sketchers translate what they see onto the page not as an imitation of reality but as a comprehensive union of voids and solids light and shadows lines and shapes For nearly forty years revered Cooper Union professor and artist Sue Gussow has taught aspiring architects of varying abilities how to fully observe and perceive the spaces that make up our physical environment Gussow skillfully applies architectural language to twenty one drawing exercises that tackle a variety of forms from peas in a pod to monkeys skeletons dinosaur bones and the art of Giacometti and Mondrian She shows for example how cut fruit and paper bags reveal that the physical world is made up of planes dimensions and enclosed space

Earth Sciences Imran Ahmad Dar,2012-02-03 The studies of Earth s history and of the physical and chemical properties of the substances that make up our planet are of great significance to our understanding both of its past and its future The geological and other environmental processes on Earth and the composition of the planet are of vital importance in locating and harnessing its resources This book is primarily written for research scholars geologists civil engineers mining engineers and environmentalists Hopefully the text will be used by students and it will continue to be of value to them throughout their subsequent professional and research careers This does not mean to infer that the book was written solely or mainly with the student in mind Indeed from the point of view of the researcher in Earth and Environmental Science it could be argued that this text contains more detail than he will require in his initial
