The Microscope in Medicine Lionel Smith Beale, 1878 **Archives of the Vagina** Margaret Aranda, 2014-11-04 In 2012 the American College of Obstetricians and Gynecologists encourages women to educate themselves about their midlife health issues and to talk with their Ob Gyn about their concerns Educate themselves about menopause hormone replacement therapy hysterectomy and whether or not to keep their ovaries In the USA for women over 45 years old 40% have had a hysterectomy and about half have had normal ovaries removed Second opinions show that 90% of hysterectomies are unnecessary Post menopausal women are supposed to tell their doctors that they don't want to have sex any more because it feels like a stabbing knife Studies show that women

don't like asking their doctors about sex and doctors don't like asking women about sex either I'm a Stanford trained doctor and you bet I educated myself And now I'm passing it on to you Because no one showed me how to put in a tampon no one explained how sexually transmitted diseases are passed on from one person to another and just like you I wanted my daughter to grow up with better information than I did *Archives of the Roentgen Ray* ,1910
