Conditional

Process Analysis in Two-instance Repeated-measures Designs Amanda Kay Montoya, 2018 In this dissertation I propose a path analytic approach to assessing moderated mediation models for two instance repeated measures designs In Chapter 1 I review the development of conditional process analysis in between subjects designs In Chapter 2 I review existing methods for mediation and moderation in two instance repeated measures designs In Chapter 3 I provide a general framework for estimating conditional process models for two instance repeated measures designs with one moderator and one mediator I describe how simplifications of this general model correspond to more commonly used conditional process models such as first stage conditional process models and second stage conditional process models In Chapter 4 I provide examples of the models described in Chapter 3 using data sets from a variety of areas of psychology These examples show how to implement conditional process analysis and how to interpret the results of such an analysis Multiple Regression and Beyond Timothy Z.
