Emerging Technologies in Architecture Matthew N. O. Sadiku, 2025-10-24 This is a comprehensive introductory text on the issues, ideas, theories and applications of emerging technologies in the architecture industry. It provides an overview of each technology in simple terms so that beginners can understand it. It is a must-read book for anyone who wants to learn about modern architecture, which has become vital in many areas of life. *Couture Fashion Law* Tomruk

Üstünkaya, 2025-05-06 This book provides an insight into the legal workings of the most ostentatious fashion sector, Couture, whilst simultaneously advocating for stronger legal protection in this industry. Offering an interdisciplinary approach including art theory from Tolstoy and Rand amongst others, the book examines where Couture fashion sits within the law. Most significantly, the book considers the couturier as an artist and Couture as art in relation to how this art form may be protected legally by copyright. Reflecting on contemporary issues, it analyses recent legal cases together with legislation to provide awareness on the current position and considers implications for the future by suggesting legal frameworks in pursuit of improvements. Using U.K. law as a case study, the book also comparatively assesses global fashion law, analysing the legal workings in the E.U. and the U.S. The book will be of interest to researchers in the field of fashion law, copyright law, art and intellectual property.
