Architecture For Humanity Haiti:

Humanitarian Architecture Esther Charlesworth, 2014-06-27 Never has the demand been so urgent for architects to respond to the design and planning challenges of rebuilding post disaster sites and cities In 2011 more people were displaced by natural disasters 42 million than by wars and armed conflicts And yet the number of architects equipped to deal with rebuilding the aftermath of these floods fires earthquake typhoons and tsunamis is chronically short This book documents and analyses the expanding role for architects in designing projects for communities after the event of a natural disaster The fifteen case studies featured in the body of the book illustrate how architects can use spatial sensibility and integrated problem solving skills to help alleviate both human and natural disasters The cases include Lizzie Babister Department of International Development UK Shigeru Ban Winner of The Pritzker Architecture Prize 2014 Shigeru Ban Architects and Voluntary Architects Network Japan Eric Cesal Disaster Reconstruction and Resiliency Studio and Architecture for Humanity Japan Hsieh Ying Chun Atelier 3 Taiwan Nathaniel Corum Education Outreach and Architecture for Humanity USA Sandra D Urzo Shelter and Settlements and International Federation of the Red Cross and Red Crescent Societies Switzerland Brett Moore World Vision International Australia Michael Murphy MASS Design Group USA David Perkes Gulf Coast Community Design Studio USA Paul Pholeros Healthabitat Australia Patama Roonrakwit Community Architects for Shelter and Environment Thailand Graham Saunders International Federation of Red Cross and Red Crescent Societies Switzerland Kirtee Shah Ahmedabad Study Action Group India Maggie Stephenson UN HABITAT Haiti Anna Wachtmeister Catholic Organisation for Relief and Redevelopment Aid the Netherlands The interviews and supporting essays show built environment professionals collaborating with post disaster communities as facilitators collaborators and negotiators of land space and shelter rather than as save the world modernists as often portrayed in the design media The goal is social and physical reconstruction as a collaborative process involving a damaged community and its local culture environment and economy not just shelter projects that build houses but leave no economic footprint or longer term community infrastructure What defines and unites the architects interviewed for Humanitarian Architecture is their collective belief that through a consultative process of spatial problem solving the design profession can contribute in a significant way to the complex post disaster challenge of rebuilding a city and its community *Architect*, 2010 **Design Like You Give a Damn [2]**

Architecture for Humanity, 2020-12-08 Design Like You Give a Damn 2 is the indispensable handbook for anyone committed to building a more sustainable future Following the success of their first book Architecture for Humanity brings readers the next edition with more than 100 projects from around the world Packed with practical and ingenious design solutions this book addresses the need for basic shelter housing education health care clean water and renewable energy One on one interviews and provocative case studies demonstrate how innovative design is reimagining community and uplifting lives From building material innovations such as smog eating concrete to innovative public policy that is repainting Brazil's urban
