## **Architecture Books Le Corbusier:**

**Le Corbusier in Detail** Flora Samuel, 2007 A highly original study of one of the most influential architects of the 20th century

**Towards a New Architecture** Le Corbusier, 1986-01-01 This pioneering proclamation by the great architect expounds Le Corbusier's technical and aesthetic theories, views on industry, economics, the relation of form to function, mass production, spirit, and much more. Profusely illustrated with over 200 line drawings and photographs of Le Corbusier's buildings and other important structures.

**The Le Corbusier Guide** Deborah Gans, 2014-05-16 The Le Corbusier Guide presents the architecture of Le Corbusier. The focus is on Paris, given that it is his adopted city and the place where he came of age. Within its environs is a representative sample of his built work. It contains most of his purist houses and an early foray away from the crisp surfaces of Purism. This itinerary follows the outlines of Le Corbusier's life's work. Beginning at his birthplace in La Chaux-de-Fonds, Switzerland, the route continues to Paris, to the perimeter of France, and finally to the international scene. Architects' architecture in Paris is also presented, as is Le Corbusier's work in Switzerland, Belgium, Germany, Italy, United States, Argentina, Brazil, Tunisia, Iraq, Japan, USSR, and India. The itinerary includes not only the buildings but also the process of getting from one to the next. On the open road, it is a pleasure to remember Le Corbusier's own joy of self-propulsion in the automobile, efficiency and speed in the train, and the thrill of flight as he experienced it with the poet of flight, Antoine de Saint-Exupéry. All these mimetic pleasures are ancillary to the experience of the buildings in situ, in their complex relationship to local landscape, national spirit, and international vision.

**Toward an Architecture** Le Corbusier, 2007 Published in 1923, *Toward an Architecture* had an immediate impact on architects throughout Europe and remains a foundational text for students and professionals. Le Corbusier urges readers to cease thinking of architecture as a matter of historical styles and instead open their eyes to the modern world. Simultaneously a historian, critic, and prophet, he provocatively juxtaposes views of classical Greece and Renaissance Rome with images of airplanes, cars, and ocean liners. Le Corbusier's slogans, such as "the house is a machine for living in," and his philosophy changed how his contemporaries saw the relationship between architecture, technology, and history. This edition includes a new translation of the original text, a scholarly introduction, and background notes that illuminate the text and illustrations.

**Le Corbusier Public Architecture 80** Pub June 2021 Y. Fei, 2021-06-14 Through the process of redrawing the plans of a wide range of completed projects by Le Corbusier, this book offers a new interpretation of his architectural works. Redrawing all the technical drawings provides an insight into the thoughts of the architect when dealing with different building types, with different functions, and provides a fresh understanding of the morphological strategies. Containing 11 different types of public buildings completed by Le Corbusier, this book draws on 80 of his works and includes drawings and 3D model spatial diagrams. When examined in the context of completion date, the reader is able to observe the continuity and transition of Le Corbusier's design ideas. By focusing on Le Corbusier and his influential architecture, the book provides a better

understanding of the morphological basis of modernist architecture in the 20th century 00Yu Fei specialised in Le Corbusier's designs during his studies at Peking University Over the course of three years Yu Fei methodically researched and analysed the work of more than 80 public global architecture projects He is currently studying for his PhD in Architecture at Waseda University in Japan
