Belonging and Identity in STEM Higher Education Camille Kandiko Howson, Martyn Kingsbury, 2024-07-30 In *Belonging and Identity in STEM Higher Education* leading scholars teachers practitioners and students explore belonging and identity in Science Technology Engineering and Mathematics STEM fields and how this is impacted by disciplinary changes and the post pandemic higher education context In STEM fields positivist approaches and a focus on numerical data can lead to assumptions that they are unemotional impersonal disciplines The need for mathematical competency logical thinking and disciplinary contexts can be barriers to engagement belonging and success in STEM STEM ways of thinking such as those underpinning abstract and complex mathematics can form the basis for new ways of conceptualising belonging for both staff and students going beyond socio demographic and cultural differences In this book chapters and case study contributions analyse what is unique about STEM educational environments for staff and students in the UK Ireland Europe Scandinavia and Asia The authors examine the role of STEM pedagogies in facilitating belonging variable impacts across student characteristics and the experiences STEM students face in their higher education experiences It provides a valuable resource for those working in equity diversity and inclusion EDI STEM educational researchers and practitioners as well as offering insights for academics and teachers in STEM higher education

Building Tomorrow's Biomedical Workforce: Evaluation of How Evidence-Based Training Programs Align Skill Development and Career Awareness with a Broad Array of Professions Adriana Bankston, Rebekah L. Layton, Audra Van Wart, 2025-08-27 Building the future STEM workforce requires robust federal investments to support the next generation of innovators as well as systemic changes to enable graduate and postdoctoral researchers to transition with confidence into the biomedical workforce This effort involves the transformation of the biomedical research enterprise and training environment at all levels but especially at the predoctoral and postdoctoral levels Innovative initiatives in education and training as well as career and professional development of biomedical trainees are necessary to build upon the robust biomedical workforce of today and create and sustain a diverse innovative and highly trained biomedical workforce of tomorrow An important aspect of supporting the biomedical workforce relates to changes within training and the research enterprise with opportunities for re imagining what STEM education should look like at different levels including providing agency for junior scientists in the field The future of the field should focus on inclusivity supporting trainees from different backgrounds and with diverse perspectives including but not limited to intersectional identities in race ethnicity gender sexual orientation first generation status and international talent in STEM This requires critical policy changes in order to support the transition of biomedical research professionals into the labor market

Safety and Resilience of Higher Educational Institutions Takako Izumi, Indrajit Pal, Rajib Shaw, 2022-06-21 The world has spent the majority of 2020 enduring an unprecedented crisis caused by the COVID 19 pandemic The impact of this crisis has been enormous and the situation has yet to be resolved It is still difficult to anticipate when the

pandemic will end and how our lives will have changed after the crisis Higher educational institutions HEIs have also had to undergo tremendous transformation in particular changing a conventional educational teaching and learning system to a digital and online mode and cancelling or postponing important events such as graduation and entrance ceremonies and entrance examinations In addition a number of HEIs have been facing financial constraints due to reduced enrolment particularly from overseas Students have missed opportunities to meet their family and friends causing profound psychosocial impact and stress for all concerned Simultaneously however the situation has given HEIs a good opportunity to consider their disaster preparedness response and recovery capacity on campus Some surveys have highlighted a lack of preparedness for pandemic and other hazardous risks beyond natural hazards Safety issues are a top priority at HEIs because they bring together a number of students faculty and staff This book covers the experiences and lessons learned from HEIs in preparedness response and recovery during the COVID 19 pandemic to prepare for such calamities beyond natural disasters in the future The book consists of 15 chapters divided into three major sections They highlight the importance of HEIs governance issues in disaster risk management examine the challenges that HEIs have faced during the pandemic and the implementation of new teaching and learning methodologies and provide innovative responses and preparedness by HEIs based on science and technology respectively
